YOUR COMMENTS ON THE CASE

I strongly oppose the expansion of Luton Airport due to the negative impact air travel has on globally warming. If air passengers, the airline industry and Luton Airport itself, paid for the damage it causes the demand for air travel would decrease because there would not have been the proliferation of cheap flights .

I also strongly oppose the expansion due to the impact on the local environment and the negative impact expansion will cause to Bedfordshire and Hertfordshire residents physical mental health. There will be an increase in car traffic as many passengers will not use public transport. Pollution from cars will decrease the air quality in an area which already has sections which are above safety guidelines. Heavy traffic and increased traffic jams will lead to increased stress for both road users and those living near congested roads. Noise from aircraft will impact on people's ability to sleep which can lead to both physical and mental health problems.
