YOUR COMMENTS ON THE CASE

Dear Sir/ Madam.
I have already made many written objections to all Expansions at Luton Airport, and spoke at the most recent planning meeting in December 2021 in Luton town hall. I and my family object to any increase in aviation traffic, the pollution from fossil fuels is known to be heating up our planet at a dangerous pace. The air we breath is vital for life, and must be clean, but most people now only breath polluted air, causing ill health and death.
We are all aware of the climate Emergency that Globally is needing to be tackled, Luton has played lip service in declaring a Climate Emergency, but instead of decreasing its pollution wants to increase it. There are about 100 deaths in Luton alone due to air pollution and about 7 million world wide. We have a responsibility as intelligent thinking beings to stop burning fossil fuels. Planes produce tonnes of CO2 on every flight, creating catastrophic greenhouse gas which in turn heats up our atmosphere making extreme weather events more and more common. Parts of the world are already loosing their homes under the rising sea, and others are unable to grow crops due to drought. We must not make matters worse by expanding Luton Airport. We need to DECREASE aviation. Thank you, Sophie
