Subject: 21/00031VARCON - Luton Airport 18m - 19m passenger increase
Date: 22 May 2022 08:50:09

Dear Holly,
I wasn't going to send additional representations to you as I know others will point out the problems for people like myself living in Wigmore, not far from the airport, about the
i) constant drone of noise, disturbance from noisy night flights (I am told they are mainly cargo therefore much noisier older planes) which I then cannot get to sleep from.
ii) the already high levels of pollution in the town enhanced by the constant flow of traffic to the airport which doesn't even take account of the air side aircraft activity with its associated well documented emissions.
iii) the often taste in the mouth of aircraft fuel when I walk out with my dogs.

However, what has really upset me is that on 30th May 2022 the Agenda for a Luton Borough Council (LBC)meeting shows that the council are looking to provide £600K towards this application which is being made by a private company namely London Luton Airport Operations Ltd, who have wealthy owners and are, indeed, the applicant.

LBC has withdrawn so many basic services in the town, for example the elderly, child, youth and library services, or increased the charges so much that they can no longer be afforded by the very people who need them. Yet here they are planning to give away money paid by residents in their council taxes to a company that has it's own wealth to achieve their aims.

I am very much against this plan.
Thank you for taking my view into account.
Kind regards,
Jan Ingham
