YOUR COMMENTS ON THE CASE

I fully oppose the application on a number of grounds the main two being as follows

The noise level for local residents (and we are not as close as some) has increased tremendously and is very disruptive to normal life and sleeping. It is also disturbing that the agreed limits in previous approvals have not been adhered to thus increasing the noise levels, and quieter planes and trajectories have not been implemented as over promised.

The second objection relates to climate change. Increasing flight frequencies will not achieve the UK governments targets of net zero. a certain amount of air travel is essential but no further increases should be considered.
