Subject: Flights and expansion of Luton Airport enquiry
Date: 15 May 2022 08:54:27

Dear Ms Dutton
I am writing to say that I object to further flights from or to Luton Airport. I am under the flight path now aircraft flying directly over my property where as before they flew either side of Royston ie to the North or South. Now the planes are flying North to South and vice versa creating more aircraft noise and disturbance. This is the summer months particularly disturbs the peace and at times you can smell the aircraft fuel.
We have however the need to fly much less if we are to achieve net zero. Sadly bio fuels are not the answer as they still emit C02.
I realise that local jobs are at stake. Unfortunately this is a very short term view because if we do not rise to this challenge we won't have a society that will enable flying except for perhaps the exclusive few.
We need to make train travel much more cost effective for people to travel any where by train. Increasing air travel in its current form will not help humanity in the long run, whilst we give permission for air travel to expand as it is there will be no incentive to change and find methods of air travel that are more environmentally positive. We can do this if people making the decisions have the courage to change things.
Yours sincerely
Janet Rossignol-Bubbins
