YOUR COMMENTS ON THE CASE

I strongly oppose this application and further capacity being afforded to Luton Airport:
- the noise associated with the aeroplanes is intolerable;
- the environmental damage, including global warming, caused by the jet fuel emissions is significant and unacceptable;
- the local transport infrastructure is not able to support further expansion (and can barely support existing volumes);
- previous planning conditions have been broken and NOT been enforced by Luton Borough Council as the planning authority. Trust in LBC has been completely eroded given that it acts as planning authority and also financial beneficiary;
- the number of night flights has increased significantly since 2014 - sleep patterns have been interrupted as a consequence and will be more so with any increase.

I oppose the application to increase passenger capacity to 19 million ppa and to increase noise contour levels. The comments that I submitted on the Luton Planning Portal for this application still stand.
