YOUR COMMENTS ON THE CASE

I strongly oppose the application from Luton Airport to expand capacity to 19 million passengers and increase its noise contours, for the following reasons:
a. More passengers mean more planes which means more noise giving sleep disturbance, there have been increasing numbers of night time planes, around 10.30pm and 4.30am over Hitchin; I try to be more tolerant of plane noise during the day
b. Luton airport specializes in short haul flights which have a disproportionately large effect on carbon emissions thus worsening climate change
c. I live near the road to Luton, already very busy, yet more passengers will give more car emissions, noise and rubber tyre particle pollution
d. It is disgraceful that the airport's proposals will contravene Luton town's local plan and government policy which asks for noise from aircraft to be reduced and not increased over time
c.
