Dear Mr Grayling

I'm writing to you with utter disgusts of the motion that RVR are proposing to make a CPO of private land for a hobby business and the disregard of the lives that this effects. This is not a necessary infrastructure requirement by any means.

This Hugh additional safety risks that will come with adding additional level crossings to the most dangerous road in Sussex the A21. The road that has had millions spent on to increase efficiency and safety over the years. This includes the government and network rail committing to removing as many level crossings as possible.

That fact that RVR have taken no precautions to help prevent the additional flood risks the new line would course.

The fact that our village will not benefit from any passing trade and that additional parking for the extra visitors has not been provided. I believe their idea is to make our village the free car park for RVR users. We already have a big problem with commuters doing the same thing.

All major questions raised by the community seem to be swept under the carpet with no response. Like the fact that the majority of trains will be diesel not steam which creates huge amounts of pollution while the train sits in the station warming up!

I hope you have the common sense to dismiss their request.
Please reply with your views.

Regards
Aaron Rowsell
