

## Appendix 5

Picture of the pavement beside B1113 about 1Km north west of the Stacpool section in Needham Market, recently widened at the insistence of Suffolk County Council as part of Mid Suffolk District Council planning application ref 3153/14 for a residential development. The path is now over 1.8 metres wide. Note that this is within the 30mph zone. This view is looking south east.

Signage recently added suggest that this view is intended to be a combined cycle way and pedestrian path.

However, the footpath on the opposite side of the road has also been widened and appears to be solely for pedestrian use. This view is a hundred metres or so closer to Needham Market looking south east again. Note that the developer has provided an abutment to retain the bank. Again the footpath is over 1.8 metres wide.
