

Joanna,

I am writing to confirm that Bacton United '89 Football Club supports Mr Bakers alternative proposal.

As he states, the closure of S69 is convenient to nobody but NR. The proof of evidence gathered by Network Rail for S69 contained a census taken in June. This footpath and crossing leads to the village football club and June is the only month when nothing happens at the club so is not representative.

NR's suggested diversion will not "reduce the amount of on-road walking along the busy B1113" as stated in NR's response, it will increase it due to users of the football club having to walk on the road instead of the footpath.

Regards

Martin Feavearyear
