13<sup>th</sup> February 2018STATEMENT OF CASE WEATHERBY CROSSING NEWMARKETTO WHOM IT MAY CONCERN

I used The Weatherby Crossing for twenty odd years it is like a life line to the town for me. I do not drive a car and I need the crossing to get to the town for many reasons.

1. To get to the doctors when necessary.
2. To get to the hospital for blood tests etc.
3. We have to recycle our gloves from time to time and the nearest bottle is across the railway line.
4. And last but not least I have to do my shopping in the town because as I said before I do not drive.

I think in this day's age authorities assume that everybody can drive and own a car and those that don't are ignored.

If it is so necessary to close the crossing, why can't have a foot-bridge across the line, but I suppose that will cost too much money.

Yours faithfully
