Your ref TWA/17/APP/04/OBJ/18

I wish to present evidence at the forthcoming inquiry

Dear Sir.

Re: The closure of the Woolfherby pedestrian rail crossing.

We object to this closure because it is a much needed pedestrian rail crossing for Newmarket people.

This closure would cut the town in half. People use it for access to the town shops, schools, allotments and football matches. Rail net work did a survey and found it was used by approx 500 people a day.

There has never been an accedent there. The view both ways is very clear. It is only a one rail line track. The trains are slower there because they are nearing the station.

This is the views of the members of the club I represent and we feel it is a strong case for leaving the crossing as it is.

Yours faithfully

Chair Newmarket Ladies open door club.
