RE: Planning application ref no: 18/15118/out
24.1.2019

In response to the above planning application - all and any evidence or corrections are accepted that the existing airport expansion plans are not fitting into consideration the extra road traffic emissions, and noise even without the proposed extended night time flying within a predictive green belt area; with no infrastructure in place.

Low emissions and quieter aircraft engines would make the trouble for day to day living than the plans presented seem to suggest. If the airport was to be expanded I would like the planning committee to advise their plans to 'sit in' more with the curfew and fire, port operations who have used and managed this land for years - rather than being full of it.
