Your ref: 18/P/5118/OUT
Date: 08 January 2020

Dear Mr Underhay

DEVELOPMENT TO INCREASE THE OPERATIONAL CAPACITY OF THE AIRPORT TO 12 MILLION PASSENGERS PER ANNUM (LIST OF DEVELOPMENT PROPOSALS PREVIOUSLY SENT) AT BRISTOL AIRPORT, NORTH SIDE ROAD, FELTON, WRINGTON

The Environment Agency has received additional correspondence dated 20 December 2019 from the applicant concerning the above proposal, which was copied to the Local Planning Authority (LPA).

This additional information and our subsequent meeting with the applicant provides clarification in relation to the Agency's correspondence dated 28 November 2019.

Therefore our position now remains as set out under earlier response to the LPA dated 29 January 2019.

Bristol Airport will also be required to comply with the Mitigation measures to protect groundwater quantity and quality as set out in the Environment Statement.

I have copied this correspondence to Bristol Airport and their consultants for their information.

Please quote the Agency's reference on any future correspondence regarding this matter.

Yours faithfully

Richard Bull
