Our Ref: HR008
Your Ref:

11th November 2019

18/P/5118/OUT: Bristol Airport North Side Road Felton Wrington

Publow with Pensford Parish Council would like to register our OBJECTION to the airport extension.

As the parish lies under the flight path for the airport, the Parish Council's concern is that the increased numbers will result in an increase in the number of evening and night flights, particularly throughout the summer when residents like to enjoy their gardens. This will result in an increase of noise pollution, and air pollution for the residents of our Parish.

Until the Cap16 changes are implemented, the impact on the rural villages that surround the airport cannot be accurately identified. If the routes remain as they are, then the residents of our parish will be impacted. If the routes change, then villages that are currently unaffected by airport may be impacted and may not be aware that they should be taking part in this consultation. The Expansion should not be considered until the Cap16 changes are implemented and the true impact can be assessed.

Regardless of the flight routes into the airport, the congestion on the roads through the region will increase. One of which (A37) goes straight through our Parish and is already subject to concern over dangerous pollution levels. The Parish Council cannot support a proposal that will increase the congestion and pollution along this route.

Although our Parish is not in North Somerset we will be impacted by your decision and I am sending a copy of this letter to Sarah Warren at Bath & North East Somerset Council to ensure that she is aware of the concerns held by the rural villages.

Yours Faithfully

[REDACTED]
Helen Richardson
Clerk to Publow with Pensford Parish Council
