Subject: Rother Valley Railway Departure Submission

Dear Mike,

In advance of the meeting on 6 August, I thought it would be helpful to give you more detail on the issues centred around the mitigation to the A21 being proposed.

The concerns are centred around:

- managing the speed of traffic to provide a compliant, or relaxed, Stopping Sight Distance to the back of the shortest typical queues generated by the crossing;
- queuing back onto the roundabout generated by the longest typical queues associated with the crossing;

We look forward to talking this through on Friday 6 August at 0930.

Kind regards,

Paul
