

I am writing to object to another request from the Canadian owners of Bristol Airport to expand.
Please could my opposition be registered somewhere.
It is already a large airport taking up a huge amount of land in an area of beauty and agriculture. Causing when things are normal massive congestions on the roads leading to it.
Please respect the wishes of those who wish to protect the countryside into consideration and wish to lessen pollution not increase it. The people who live near and in the vicinity of the flight paths should also be considered, their quality of life would be diminished even more by expansion.
With best wishes,
Cherry Bretten
