

Please do all you can to arrest expansion at Bristol Airport. The price of growth will be sacrificing a good night's sleep for local people **and** safe roads **and** air quality. Is that fair? Surely a basic human right to be able to sleep! I use the airport but would happily limit my use to preserve the peace and quiet. I think that many locals would do the same. So would the greater population if it was put to them.

We are half an hour from the airport but I was again awoken at half past midnight yesterday morning by an overflying 'plane. They are not supposed to overfly an AONB or so late/early but regularly contravene regulations. I live in a village whose roads I have contributed to as a long time, rate paying resident and this infrastructure is key to the access for the airport. Why? Because the public transport system to get there is non-existent. In these days of planet consciousness it is an outrage that the owners of the airport are proposing to put in a bicycle rack to a newly expanded airport to encourage passengers to cycle there. No doubt luggage will be dropped by drones?! That is their cynical contribution to sustainability. The fact is that it is unsustainable now, let alone if it expands. During the holiday season the road through the village is an obvious route and it becomes impossibly dangerous to walk along as the traffic is so heavy and fast. Forget walking your children to school!

Any help you might require I would gladly lend

With thanks

Jane Clayton
