Notes:

1. House price data are taken from ONS House Price Statistics for Small Areas for the year ending September.
2. Earnings data are taken from the Annual Survey of Hours and Earnings. These figures are estimates of gross residence-based individual full-time annual earnings where available.
3. Data for annual earnings are not available for some areas. For these areas the ratio of house prices to earnings has been calculated using annualised weekly earnings. These are recorded in ***bold grey italics*** .
Annualised weekly earnings are not produced on an identical basis to annual earnings and are therefore not directly comparable.
4. These affordability ratio statistics are revised annually, to reflect revisions to the house price statistics and earnings data.
The earnings data used in the housing affordability calculations comes from the Annual Survey of Hours and Earnings. The data for the latest year is released as provisional, and then revised with the following annual release.
Earnings data is collected as at April of each year with the results published in October. Therefore, new information can still be received subsequently, and this is inputted into the revised data.
In addition, house price statistics are also subject to revision, as there can be a lag in the registration of property transactions.
5. If a geography change is made, the entire time series reflects the new structure, avoiding geographical breaks in the time series
