Subject: Quarry

I feel that the resident's views of West Hatfield. Smallford, East St. Albans and all surrounding areas are being ignored.
The green belt will be totally destroyed by more development of this site.

We currently have green fields and open spaces between ourselves in Hatfield and St, Albans which surely must be a high priority in this age of Covid. This area has been a godsend to all local people who have availed themselves of outdoor activities and walking facilities during this time, and no-one can categorically say yet that this pandemic is truly over.

Brett appear to amend their application thinking that we will all be too apathetic eventually to protest. Perhaps all the monies they are spending would be better spent on worthier projects than lining their own pockets? Health of the residents and everyone else affected must be more important than monetary gains?

Brett also seem to be forcing this application/appeal through with total disregard for any local views or opinions. They will not only deprive us of open areas and its wildlife but cause chaos with its attendant safety issues on our local roads over the whole area, and create further health issues with dust and fumes
