

## **Cambridgeshire South Infrastructure Enhancement TOWA**

I wish to raise the following issues before the Inquiry resumes.

### ***Compound***

The proposed railway compound to the south of Addenbrooks Road forms an integral part of the Scheme. It is also the subject of numerous objections. I am unclear as to where it is assessed within the ES, although I acknowledge that it forms part of the request for deemed planning permission and is shown on various plans including the parameter plans.

### ***Outstanding Objections/Representations***

I understand that it is your preference not to have a session to address the outstanding objections since you consider that these matters are covered satisfactorily within the submitted evidence. I appreciate that evidence on many of the matters raised in the objections has been addressed during the course of the Inquiry, however, as you will be aware, I not only need to report the outstanding objections, but also your response to them. I would therefore request a note setting out the outstanding objections and where the response to them can be found. This is for the benefit of the SoS as well as myself, and will ensure that your response to each and every objection is clear.

Your comments in relation to the representations received would also be helpful.

I particularly request that you review the objections from Pemberton Estates, St John's College and St Mary's School. In the case of the latter there would appear to be a conflict between Mr Pearson's evidence and that of Mr Simms.

The note should be submitted by Monday 21 February. I consider that there would be sufficient time within the timetable for that week to review any outstanding matters in relation to these objections and representations if necessary.

### ***Hobsons Park***

I note a reference within the representations to an elevated pathway through Hobsons Park. I would welcome clarification of this matter. Recognising that this week is focussed on the evidence from Smarter Transport for Cambridge and the Councils I am content to receive this information in writing by Monday 21 February, or when we resume on 22 February.

Lesley Coffey

Planning Inspector
