

Table BH7

This Table BH7 states the following:

- Heritage significance of all HAs lying within the study area*;
- Contribution of setting to heritage significance*;
- Likely Significant Effect on HAs;
- Mitigation measures;
- Likely Residual Effect on HAs; and
- Whether an effect is considered to be significant in EIA terms (for the April 2021 ES (TVIBHA), 'moderate' or 'major' effects are deemed to be significant in EIA terms).

* For a summary of the heritage significance and the contribution of setting to heritage significance of each HA assessed, the reader should refer to the section on the 'Completed and Operational Development', which immediately follows the section on the 'The Works' below in this table. The effects on HAs during 'The Works' are summarised in the table below. For more detail on these effects, refer to Chapter 12 of the April 2021 TVIBHA (paragraphs 12.16-12.20).

Heritage Asset	Heritage Significance	Contribution of setting to heritage significance	Likely Significant Effect	Mitigation Measures	Likely Residual Effect	EIA Significance
The Works						
Group (i) - The Site: Nos. 4-8 and 12-16 St Thomas Street and attached railings.	See Completed and Operational Development	See Completed and Operational Development	Short to medium term, adverse effect (direct) of moderate to major significance.	Prior to the Works: Necessary protective measures would be identified through consultation with the relevant	Short to medium term, adverse effect (direct – physical works) of moderate to major significance.	Significant

Heritage Asset	Heritage Significance	Contribution of setting to heritage significance	Likely Significant Effect	Mitigation Measures	Likely Residual Effect	EIA Significance
			<p>Short to medium term, adverse effect (indirect) of moderate to major significance.</p>	<p>parties and review and sign off on a pre-construction condition survey of adjacent historic assets.</p> <p>Historic building recording would be undertaken prior to the Works commencing, the scope of which would need to be agreed with LBS and secured via an appropriately worded planning condition.</p> <p>During the Works:</p> <p>Hoarding – As stated in Chapter 6 of the April 2021 ES and the Outline Construction Management Plan (CMP) submitted with the planning application, a 3.0m high plywood hoarding will be erected along site boundary. Hoardings and scaffold sheeting will be of the highest standard and inspected and maintained regularly.</p>	<p>Short to medium term, adverse effect (indirect - on setting) of moderate to major significance.</p>	

Heritage Asset	Heritage Significance	Contribution of setting to heritage significance	Likely Significant Effect	Mitigation Measures	Likely Residual Effect	EIA Significance
				<p>Dialogue with TFL will be required as early as possible during the preconstruction period, to determine what will be permissible. A pit lane will be formed which will allow the delivery vehicles to pull off the road to unload in a safe manner. It will also keep the carriageway open at all times. The hoarding erected off TVCBs and external lighting will be used to illuminate the hoarding around the perimeter. The temporary vertical concrete barriers (TVCB)'s will be bolted together providing a robust structure against accidental impact loadings.</p> <p>The main New City Court building will be demolished starting roof and working down to the ground floor slab. The works will be subject to the</p>		

Heritage Asset	Heritage Significance	Contribution of setting to heritage significance	Likely Significant Effect	Mitigation Measures	Likely Residual Effect	EIA Significance
				<p>detailed method statement from the demolition contractor. The lift will be removed early in the programme and the shaft will be used to drop debris to ground floor. All debris will then be removed using plant to an awaiting wagon or skip and removed from site. No crushing will be allowed on site due to noise and the proximity of the residents.</p> <p>Temporary works will be installed to back prop the existing ground floor back to basement level, to ensure the existing slab has safe capacity to support the demolition plant and construction vehicles.</p> <p>Use of excavation and demolition methods that produce low vibration levels and</p>		

Heritage Asset	Heritage Significance	Contribution of setting to heritage significance	Likely Significant Effect	Mitigation Measures	Likely Residual Effect	EIA Significance
				<p>participation in a monitoring programme to ensure vibration levels are within established thresholds. For example, as noted at in Chapter 8 of ES Volume 1 – Noise and Vibration of the April 2021 ES:</p> <p><i>‘Where listed structures and rail assets are located within 10 metres of piling or breaking up of concrete slabs mitigation including the use of low vibration generating techniques should be considered to ensure vibration levels at these locations do not exceed 10mm/s.’</i> (Paragraph 8.75);</p> <p><i>‘Monitoring of vibration should also be undertaken, where necessary, to ensure vibration levels at these receptors do not exceed 10mm/s when piling works are being</i></p>		

Heritage Asset	Heritage Significance	Contribution of setting to heritage significance	Likely Significant Effect	Mitigation Measures	Likely Residual Effect	EIA Significance
				<p><i>undertaken within 10m'. (Paragraph 8.75);</i></p> <p><i>'Monitoring of Site of vibration should be undertaken when piling works are being carried out within 10m of Listed Buildings, utilities and LUL lines. Monitoring will ensure vibration at these assets does not exceed 10mm/s'. (paragraph 8.86)</i></p> <p>Other measures include:</p> <p>Arrangement of delivery locations and times to limit disruption and avoid damage to the buildings;</p> <p>Ensuring surface water runoff is not directed towards the buildings;</p> <p>Directing debris chutes away from the buildings; and</p>		

Heritage Asset	Heritage Significance	Contribution of setting to heritage significance	Likely Significant Effect	Mitigation Measures	Likely Residual Effect	EIA Significance
				<p>Locating all diesel and oil filling for plant and machinery away from the buildings.</p> <p>A full list of dust mitigation is provided in Chapter 9: Air Quality of the April 2021 ES and the Outline CMP. Dust mitigation measures would include:</p> <ul style="list-style-type: none"> • All skips and muck away lorries will be dampened down via a water point adjacent to the loading area; • Skips to be securely covered and drop heights to be minimised for redundant materials to reduce dust arising when loading; • All cutting equipment to use water as suppressant or suitable local 		

Heritage Asset	Heritage Significance	Contribution of setting to heritage significance	Likely Significant Effect	Mitigation Measures	Likely Residual Effect	EIA Significance
				<p>exhaust ventilation systems where applicable;</p> <ul style="list-style-type: none"> • When demolition is taking place areas to be dampened down to reduce dust arising; • All vehicles will be washed down before leaving; <p>For more detailed information on the above measures reference should be made to the submitted Construction Management Plan (April 2021); Chapter 6 of ES Volume 1 - Development Programme, Demolition, Deconstruction, Refurbishment and Construction; and Chapters 7 (Air Quality) and 8 (Noise & Vibration) of Part 1 of the April 2021 ES.</p>

Completed and Operational Development						
World Heritage Sites						
<i>Tower of London WHS</i>	<p>The WHS Management Plan sets out a 'Statement of Significance' of the Tower of London. It summarises its outstanding universal value as follows:</p> <p><i>'The Tower of London has Outstanding Universal Value for the following cultural qualities:</i></p> <ul style="list-style-type: none"> <i>• For both protection and control of the City of London, it has a landmark siting;</i> <i>• The Tower of London was built as a demonstration and symbol of Norman power;</i> <i>• The property is an outstanding example of late 11th century innovative Norman military architecture;</i> 	<p>The Tower of London was built as a fortress and is surrounded by a defensive wall. This gives it a contained townscape character, distinct from its surroundings. To the east and north it is cut off from its context by busy roads which detract from the townscape quality of the area and isolate this historic site from its hinterland.</p> <p>The River Thames is an important attribute of the WHS's setting, contributing to its heritage significance. The same can be said for the following nearby HAs, which are noted as having group value with the Tower in their list descriptions: Tower Bridge (I); Tower Bridge Approach (I); the Mercantile Marine First World War Memorial (I); and the Merchant Seamen's Memorial (II*).</p>	Long term, regional, neutral effect (indirect) of minor significance.	None required.	Long term, regional, neutral effect (indirect) of minor significance.	Not significant

Heritage Asset	Heritage Significance	Contribution of setting to heritage significance	Likely Significant Effect	Mitigation Measures	Likely Residual Effect	EIA Significance
	<ul style="list-style-type: none"> • <i>The property is a model example of a medieval fortress palace, which evolved from the 11th to 16th centuries;</i> • <i>The property has strong associations with State Institutions; and</i> • <i>As the setting for key historical events in European history'.</i> 					
Conservation Areas						
<i>Borough High Street Conservation Area</i>	<p>The significance of the CA lies principally in the persistence, from the time of the earliest river crossing built by the Romans, of its status as a bridgehead settlement opposite the City of London. Its urban structure and its built form reflect this status. The CA Appraisal notes '<i>the importance of Borough High Street as the primary route into the City of London</i></p>	<p>The riverscape and the tight and dense urban grain that surrounds this CA are notable attributes of its setting, contributing to its heritage significance.</p>	<p>Long-term, local, beneficial effect (direct) of moderate to major significance.</p>	<p>None required.</p>	<p>Long-term, local, beneficial effect (direct) of moderate to major significance.</p>	<p>Significant</p>

Heritage Asset	Heritage Significance	Contribution of setting to heritage significance	Likely Significant Effect	Mitigation Measures	Likely Residual Effect	EIA Significance
	<i>from the south for 2,000 years is the most powerful influence on the physical evolution of the Conservation Area, and this street still forms the spine of the area'.</i>					
<i>Tooley Street Conservation Area</i>	The significance of this CA derives from Tooley Street, planned as a key route from the river crossing at London Bridge eastwards to the inner dock area of the pool of London.	The riverside context and viaduct are both important attributes of its setting, contributing to the CA's heritage significance.	Long-term, local, neutral effect (indirect) of minor to moderate significance.	None required.	Long-term, local, neutral effect (indirect) of minor to moderate significance.	Not significant
<i>Bear Gardens Conservation Area</i>	The CA's character and significance derive from its medieval and post-medieval development, with a fine urban grain. It retains 19 th century warehouses.	The riverscape and the tight and dense urban grain that surrounds this CA are important attributes of its setting, contributing to the CA's heritage significance.	Long-term, district, neutral effect (indirect) of negligible to minor significance.	None required.	Long-term, district, neutral effect (indirect) of negligible to minor significance.	Not significant
<i>Thrale Street Conservation Area</i>	The CA has significance as a notable example of a 19 th century metropolitan townscape, characterised by grand industrial and commercial	The CA's setting makes some contribution to its heritage significance. This includes the nearby areas of Bankside, Bear Gardens, Borough High Street and Union Street.	Long-term, district, neutral effect (indirect) of minor to moderate significance.	None required.	Long-term, district, neutral effect (indirect) of minor to moderate significance.	Not significant

Heritage Asset	Heritage Significance	Contribution of setting to heritage significance	Likely Significant Effect	Mitigation Measures	Likely Residual Effect	EIA Significance
	buildings built following the construction of Southwark Bridge Road and Southwark Street in the early to mid-19th century. These contrast with the surviving 18 th century buildings of Thrale Street.					
<i>Union Street Conservation Area</i>	It derives its significance from its mix of mostly 19 th century commercial, industrial warehousing, social housing and ecclesiastical development, which lies mainly within the parish of St Saviour.	The CA Appraisal notes <i>'The following areas have a significantly positive historic character and contribute to the setting of the Conservation Area: 25, Copperfield Street and former London Fire Brigade building; The Peabody Estate, Marshalsea Road and Mint Street Gardens; Flats, Great Guildford Street'</i>	Long-term, district, neutral effect (indirect) of moderate significance.	None required.	Long-term, district, neutral effect (indirect) of moderate significance.	Significant
<i>Liberty of The Mint Conservation Area</i>	The CA Appraisal notes that the CA <i>'contains a varied section of Southwark townscape broadly dating from the later 19th century. This consists of a mix of industrial, residential, educational, transport and historic, mixed-use</i>	Attributes of its setting, such as the St George the Martyrs church, which lies within the adjacent Borough High Street CA, can be said to make a contribution to the significance of this CA.	Long-term, district, neutral effect (indirect) of minor to moderate significance.	None required.	Long-term, district, neutral effect (indirect) of minor to moderate significance.	Not significant

Heritage Asset	Heritage Significance	Contribution of setting to heritage significance	Likely Significant Effect	Mitigation Measures	Likely Residual Effect	EIA Significance
	buildings fronting onto Borough High Street. The area has a particular significance due to the rebuilding of much of the area with the construction of Marshalsea Road dating from 1888'.					
<i>King's Bench Conservation Area</i>	It derives its significance from its later 18 th century street pattern, overlaid first by the mid-19 th century brick railway viaduct and then by later 19 th and earlier 20 th century low rise residential, religious and industrial development.	Its setting, which includes Borough Road and Great Suffolk Street, contributes to its significance to some degree.	Long-term, district, neutral effect (indirect) of minor/negligible significance.	None required.	Long-term, district, neutral effect (indirect) of minor/negligible significance.	Not significant
<i>Trinity Church Square Conservation Area</i>	It derives its significance from the planned, phased early to mid-19 th century residential development relating to the land parcels occupied by former market gardens.	This is an inward focussed CA. The setting of this CA contributes to its significance to a limited degree.	Long-term, district, neutral effect (indirect) of minor significance.	None required.	Long-term, district, neutral effect (indirect) of minor significance.	Not significant
<i>St. George's Circus Conservation Area</i>	It derives its significance from the layout of the roads	The main roads leading to this circus are an aspect of this CA's	Long-term, district, neutral effect (indirect) of	None required.	Long-term, district, neutral effect (indirect) of	Not significant

Heritage Asset	Heritage Significance	Contribution of setting to heritage significance	Likely Significant Effect	Mitigation Measures	Likely Residual Effect	EIA Significance
	around the obelisk, the curved façade of the former Duke of Clarence public house and the terraces on London Road and the south side of Borough Road.	setting that contributes to its significance.	minor/negligible significance.		minor/negligible significance.	
<i>Bermondsey Street Conservation Area</i>	The CA is focussed on the streets south of the London Bridge railway line to the Bricklayers Arms Roundabout. It has mediaeval origins; the historic street pattern has largely remained. Its character varies and includes 18 th century houses and shops, and 19 th and 20 th century warehouse and office buildings. It derives its significance from this.	The setting of this CA contributes to its heritage significance to a limited degree.	Long-term, local to district, neutral effect (indirect) of minor significance.	None required.	Long-term, local to district, neutral effect (indirect) of minor significance.	Not significant
<i>Tower Bridge Conservation Area</i>	The heritage significance of the CA derives from the highly graded Tower Bridge (grade I), one of the nation's most important landmarks, and the 19 th century former	The riverside is an important attribute of its setting, contributing to its heritage significance.	Long-term, local to district, neutral effect (indirect) of minor significance.	None required.	Long-term, local to district, neutral effect (indirect) of minor significance.	Not significant

Heritage Asset	Heritage Significance	Contribution of setting to heritage significance	Likely Significant Effect	Mitigation Measures	Likely Residual Effect	EIA Significance
	warehouses and other buildings associated with the Thames-side industries that once populated this area.					
<i>Whitefriars Conservation Area</i>	The heritage significance of the CA derives from its unique sense of place created by the grandeur of the Embankment and buildings, openness of the Thames and proximity of the Temples.	The Thames is an important attribute of its setting, contributing to its heritage significance.	Long-term, regional, neutral effect (indirect) of minor significance.	None required.	Long-term, regional, neutral effect (indirect) of minor significance.	Not significant
<i>Bank Conservation Area</i>	This CA derives its heritage significance from its large-scale commercial buildings set on main thoroughfares within a network of historic streets, courtyards and alleyways.	While the CA includes modern buildings, its local setting is characterised by a much greater variety of building scale and character and contributes to the significance of this CA to a limited degree.	Long-term, regional, neutral effect (indirect) of minor/negligible significance.	None required.	Long-term, regional, neutral effect (indirect) of minor/negligible significance.	Not significant
<i>Leadenhall Market Conservation Area</i>	This CA derives its heritage significance from Leadenhall Market (II*), built in 1881 to the designs of Sir Horace Jones.	The CA's setting contributes in part to its heritage significance. As noted in the CA character summary, <i>'The conservation area boundary is tightly drawn around the market buildings and the historic streets which provide its</i>	Long-term, regional, neutral effect (indirect) of minor/negligible significance.	None required.	Long-term, regional, neutral effect (indirect) of minor/negligible significance.	Not significant

Heritage Asset	Heritage Significance	Contribution of setting to heritage significance	Likely Significant Effect	Mitigation Measures	Likely Residual Effect	EIA Significance
		<i>townscape setting. The scale of market and surrounding buildings is smaller than the area's office blocks and towers and those buildings on Gracechurch Street, Lime Street and Leadenhall Street. This interplay of scales defines the conservation area's immediate backdrop, particularly the variation in building heights that create a dynamic setting'.</i>				
<i>Tower Conservation Area</i>	The CA is of significance as one of the largest and most important CAs in the LBTH, encompassing buildings and sites of national and international importance. It has two distinct character areas – the Tower of London itself to the west, and the area around St. Katharine Docks to the east. The CA Appraisal notes 'It is an area of exceptional architectural and historic interest, with a character and appearance	The CA's setting contributes in part to its heritage significance. The CA Appraisal notes: • <i>'the relationship of the city to the river...is important both historically and visually'.</i> • <i>'River traffic has been an essential part of the area's character for hundreds of years. The continued use of St. Katharine's Pier and Tower Pier today enrich the area and make a positive contribution to its urban character'.</i> • <i>'Tower Bridge, along with the White Tower, is one of the internationally recognised symbols of London. The two Victorian Gothic towers and the opening bridge,</i>	Long-term, regional, neutral effect (indirect) of minor to moderate significance.	None required.	Long-term, regional, neutral effect (indirect) of minor to moderate significance.	Significant

Heritage Asset	Heritage Significance	Contribution of setting to heritage significance	Likely Significant Effect	Mitigation Measures	Likely Residual Effect	EIA Significance
	<i>worthy of protection and enhancement.'</i>	<i>form a symbolic gateway to the city from the sea. The operation of the bascules, which lift up to allow tall ships to pass through, is a popular, dramatic and theatrical event which has become an essential part of the area's identity'.</i>				
Listed Buildings						
<i>Group (i) - The Site: Nos. 4-8 and 12-16 St Thomas Street and attached railings.</i>	It is of significance as an early 19 th century terrace of 4 storey yellow brick houses, albeit much altered in the 20 th century.	The HA has group value with the Bunch of Grapes Public House next door (II), an attribute of its setting that contributes to its heritage significance.	Long-term, local, beneficial effect (direct) of major significance. Long-term, local, beneficial effect (indirect) of moderate to major significance.	None required.	Long-term, local, beneficial effect (direct – physical works) of major significance. Short to medium term, beneficial effect (indirect - on setting) of moderate to major significance.	Significant
<i>A: Cathedral Church of St Saviour and St Mary Overie (Southwark Cathedral), Cathedral Street (grade I)</i>	The Cathedral is of significance as a Southwark landmark that stands at the oldest crossing-point of the River Thames. It has only had the status of Cathedral since 1905, but a church	The Cathedral's setting does not have any great coherence of urban form and the quality of the buildings that surround it is variable. Although the Cathedral is an important and highly graded historic building, the extent to which the Cathedral's setting	Long-term, district, adverse effect (indirect) of moderate to major significance.	None required.	Long-term, district, adverse effect (indirect) of moderate to major significance.	Significant

Heritage Asset	Heritage Significance	Contribution of setting to heritage significance	Likely Significant Effect	Mitigation Measures	Likely Residual Effect	EIA Significance
	has stood on this site since at least 12 th century and it includes surviving fabric from this period. It is first referred to as a 'minster' in the Domesday Book of 1086.	contributes to its heritage significance is therefore rather limited.				
<i>B: Remains of Winchester Palace, Clink Street (grade II*) (Also SM)</i>	It has significance as the town residence of the Bishops of Winchester from the 12th century to the Civil War, when it was used as a civil prison.	Its setting does not make a contribution to its heritage significance.	Long-term, district, neutral effect (indirect) of moderate significance.	None required.	Long-term, district, neutral effect (indirect) of moderate significance.	Significant
<i>Group (ii) - Montague Close / Clink Street (grade II)</i>						
<i>Winchester Wharf, Clink Street</i>	It has significance as a group of late 19th century warehouses on the river's edge, serving as a reminder of the industrial heritage of the area.	Its Thameside location is an important attribute of its setting, contributing to its heritage significance	Long-term, district, neutral effect (indirect) of moderate significance.	None required.	Long-term, district, neutral effect (indirect) of moderate significance.	Significant
<i>Archway beneath southern end of London Bridge, crossing Tooley Street</i>	It has significance as surviving fabric from the former London Bridge	Grade II listed Hibernia Chambers and no.4 Borough High Street are attributes of its setting that contribute to its heritage significance.	Long-term, local, neutral effect (indirect) of moderate significance.	None required.	Long-term, local, neutral effect (indirect) of moderate significance.	Significant

Heritage Asset	Heritage Significance	Contribution of setting to heritage significance	Likely Significant Effect	Mitigation Measures	Likely Residual Effect	EIA Significance
<i>Hibernia Chambers, no. 2 Borough High Street</i>	It has significance as a late-19th century chambers, originally used by the Home and Foreign Produce Exchange.	Archway beneath the southern end of London Bridge, crossing Tooley Street, and nos. 4, 6, 8, and 10 Borough High Street, all grade II listed. These all date to a similar period and are attributes of its local setting that can be said to contribute to this HA's heritage significance.	Long-term, district, neutral effect (indirect) of moderate significance.	None required.	Long-term, district, neutral effect (indirect) of moderate significance.	Significant
<i>Bridge House, no. 4 Borough High Street</i>	It has significance as one of the first grand railway hotels in London, serving London Bridge Station opposite.	Archway beneath the southern end of London Bridge, crossing Tooley Street, and nos. 2, 6, 8, and 10 Borough High Street (all grade II listed) contribute to this HA's heritage significance	Long-term, district, neutral effect (indirect) of moderate significance.	None required.	Long-term, district, neutral effect (indirect) of moderate significance.	Significant
<i>Nos. 6, 8 and 10 Borough High Street</i>	It has significance as an early Victorian bank (London & Westminster Bank).	Archway beneath the southern end of London Bridge, crossing Tooley Street, and nos.2 and 4, Borough High Street (all grade II listed) contribute to this HA's heritage significance.	Long-term, district, neutral effect (indirect) of moderate significance.	None required.	Long-term, district, neutral effect (indirect) of moderate significance.	Significant
<i>Post at north end where street divides, on east side of left fork, Cathedral Street</i>	It has significance as an early 19th century streetscape feature connected with the Wardens of the Parish of St Saviour, which dates back to the mid-16th century.	Its local setting on Cathedral Street makes a contribution to its significance.	Long-term, local, neutral effect (indirect) of moderate significance.	None required.	Long-term, local, neutral effect (indirect) of moderate significance.	Significant

Heritage Asset	Heritage Significance	Contribution of setting to heritage significance	Likely Significant Effect	Mitigation Measures	Likely Residual Effect	EIA Significance
<i>Bollard at the north-east corner of Winchester Square</i>	It has significance as an early 19th century streetscape feature connected with the Wardens of the Parish of St Saviour, which dates back to the mid-16th century.	Its local setting on Winchester Square makes a contribution to its significance.	Long-term, local, neutral effect (indirect) of moderate significance.	None required.	Long-term, local, neutral effect (indirect) of moderate significance.	Significant
<i>Bollard at the corner with Winchester Walk, Cathedral Street</i>	It has significance as an early 19th century streetscape feature likely to have been originally erected in Clink Street, perhaps near the prison.	Its local setting on Winchester Walk/Cathedral Street makes a contribution to its significance.	Long-term, local, neutral effect (indirect) of moderate significance.	None required.	Long-term, local, neutral effect (indirect) of moderate significance.	Significant
<i>Group (iii) - St Thomas Street (grade II*)</i>						
<i>No. 9A St Thomas Street</i>	It has significance as part of a rebuilding scheme for old St Thomas's Hospital between 1680 and 1732, of which only it, and No.9 adjacent, remain. Together, they form one of the more important survivals of Queen Anne architecture in London.	No 9,11, and 13 (II*) and 15 (II) St Thomas Street are important elements of no.9a's setting, contributing to its heritage significance. Heritage Asset	Heritage Significance	Contribution of setting to heritage significance	Likely Significant Effect	Mitigation Measures	Likely Residual Effect	EIA Significance
<i>Blackfriars Bridge</i>	This has significance as one of Thames' Victorian bridges (dating to 1869), thought to be by James Cubitt.	The Thames, and the adjacent Southern Abutment to the Former West Blackfriars and St Pauls Rails Bridge, Blackfriars Road (grade II) are the most important attributes of the bridge's setting to contribute to its heritage significance. The list description for the latter notes ' <i>Joseph Cubitt designed Blackfriars Road Bridge to the west (see City of London), and with it this forms a group</i> '.	Long-term, regional, neutral effect (indirect) of minor significance.	None required.	Long-term, regional, neutral effect (indirect) of minor significance.	Not significant
<i>Southern abutment to former West Blackfriars and St Paul's Rail Bridge, Blackfriars Road</i>	This has significance as a bridge abutment by James Cubitt, dating to 1862-64.	The Thames, and the adjacent Blackfriars Bridge (II) are the most important attributes of this HA's setting to contribute to its heritage significance. The list description notes ' <i>Joseph Cubitt designed Blackfriars Road Bridge to the west (see City of London), and with it this forms a group</i> '.	Long-term, regional, neutral effect (indirect) of minor significance.	None required.	Long-term, regional, neutral effect (indirect) of minor significance.	Not significant
<i>K2 Telephone Kiosk, Blackfriars Bridge</i>	This has significance as a cast iron kiosk dating from 1927, designed by Giles Gilbert Scott.	Blackfriars Bridge (II) and the adjacent drinking fountain (II) are attributes of this HA's setting that contribute to its heritage significance.	Long-term, regional, neutral effect (indirect) of minor significance.	None required.	Long-term, regional, neutral effect (indirect) of minor significance.	Not significant

Heritage Asset	Heritage Significance	Contribution of setting to heritage significance	Likely Significant Effect	Mitigation Measures	Likely Residual Effect	EIA Significance
<i>Drinking Fountain on east side of road at north end of Bridge, Blackfriars Bridge</i>	This has significance as a drinking fountain of 1861, sculpted by Wills Bros.	Blackfriars Bridge (grade II) and the adjacent K2 Telephone Kiosk (grade II) are attributes of this HA's setting that contribute to its heritage significance.	Long-term, regional, neutral effect (indirect) of minor significance.	None required.	Long-term, regional, neutral effect (indirect) of minor significance.	Not significant
<i>Statue of Queen Victoria at Approach to Blackfriars Bridge, Victoria Embankment</i>	This has significance as a late Victorian statue, by C B Birch.	Blackfriars Bridge (II) is an attribute of this HA's setting that contributes to its heritage significance.	Long-term, regional, neutral effect (indirect) of minor significance.	None required.	Long-term, regional, neutral effect (indirect) of minor significance.	Not significant
<i>K: Church of St Benet, Paul's Wharf, Upper Thames Street (grade I)</i>	The building has significance as one of the least altered of Wren's churches. Bradley and Pevsner describe it as having 'One of the most lovable of the post-Fire church exteriors, delightfully Dutch'.	The setting of the church has changed considerably since it was built and does not contribute to its significance.	Long-term, regional, neutral effect (indirect) of minor/ negligible significance.	None required.	Long-term, regional, neutral effect (indirect) of minor/ negligible significance.	Not significant
<i>L: Vintners Hall, Upper Thames Street (grade I) (Also SM)</i>	The building's significance derives from its association with one of the original medieval Livery Companies.	The building's setting has changed considerably over the centuries, limiting its contribution to its significance.	Long-term, regional, neutral effect (indirect) of minor/ negligible significance.	None required.	Long-term, regional, neutral effect (indirect) of minor/ negligible significance.	Not significant

Heritage Asset	Heritage Significance	Contribution of setting to heritage significance	Likely Significant Effect	Mitigation Measures	Likely Residual Effect	EIA Significance
<i>Group (xxviii) - Upper Thames Street (grade II)</i>						
<i>Nos.1 to 4 (Consec) Queen Street Place, including no.69 Upper Thames Street.</i>	The significance of this 1911 office building derives from its association with Thomas Colcutt, architect of the Savoy Hotel, Lloyd's Register of Shipping and the Palace Theatre.	This HA lies on the highly trafficked Upper Thames Street and Queen Street Place, which make a limited contribution to its heritage significance. Its immediate context includes the adjoining grade I listed Vintners Hall, although neither list description mentions group value.	Long-term, regional, neutral effect (indirect) of minor/ negligible significance.	None required.	Long-term, regional, neutral effect (indirect) of minor/ negligible significance.	Not significant
<i>M: Fishmongers' Hall, London Bridge (grade II*) (Also SM)</i>	The building has significance as one of only two City Companies' buildings designed in the grand manner. It is unique amongst City livery halls is its conspicuous position, overlooking the Thames by London Bridge.	The immediate setting of this building makes some contribution to its significance – it was designed to take account of the new London Bridge Approach.	Long-term, regional, neutral effect (indirect) of moderate significance.	None required.	Long-term, regional, neutral effect (indirect) of moderate significance.	Significant
<i>Group (xxix) - Lower Thames Street (grade II)</i>						
<i>Billingsgate Market, Lower Thames Street</i>	This has significance as a former market building of 1872-3 by Sir Horace Jones dates.	This HA overlooks the Thames, an attribute of its setting that contributes to its heritage significance.	Long-term, regional, neutral effect (indirect) of minor to moderate significance.	None required.	Long-term, regional, neutral effect (indirect) of minor to moderate significance.	Not significant

Heritage Asset	Heritage Significance	Contribution of setting to heritage significance	Likely Significant Effect	Mitigation Measures	Likely Residual Effect	EIA Significance
<i>Adelaide House, London Bridge</i>	This has significance as an inter-war office building by Sir John Burnet and Tait.	This HA's setting does not contribute to its heritage significance.	Long-term, regional, neutral effect (indirect) of minor to moderate significance.	None required.	Long-term, regional, neutral effect (indirect) of minor to moderate significance.	Not significant
<i>Pair of towers at Cannon Street Station western tower to Cannon Street Station, Cannon Street, Cousin Lane</i>	This has significance as mid-19 th century station tower thought to be by E M Barry.	The eastern tower to Cannon Street Station (listed separately at grade II) is the principal aspect of this HA's setting to contribute to its heritage significance.	Long-term, regional, neutral effect (indirect) of minor to moderate significance.	None required.	Long-term, regional, neutral effect (indirect) of minor to moderate significance.	Not significant
<i>Eastern tower to Cannon Street Station pair of towers at Cannon Street Station, All Hallows Lane, Cannon Street</i>	This has significance as mid-19 th century station tower thought to be by E M Barry.	The western tower to Cannon Street Station (listed separately at grade II) is the principal aspect of this HA's setting to contribute to its heritage significance.	Long-term, regional, neutral effect (indirect) of minor to moderate significance.	None required.	Long-term, regional, neutral effect (indirect) of minor to moderate significance.	Not significant
<i>N: Church of St Magnus the Martyr, Lower Thames Street (grade I)</i>	The building has significance as one of Wren's churches, albeit one that he took over from others and which was much altered subsequently.	The setting of the church has changed considerably since it was built and makes little, if any, contribution to its significance.	Long-term, regional, neutral effect (indirect) of moderate significance.	None required.	Long-term, regional, neutral effect (indirect) of moderate significance.	Significant
<i>O: Custom House, Lower Thames Street (grade I)</i>	Custom House has significance as a monumental late-Georgian administrative building formerly used for the collection of customs duties,	The riverside setting of Custom House contributes to its significance. Its immediate setting includes the River wall, stairs and cranes, Custom House Quay (grade II*). The	Long-term, regional, neutral effect (indirect) of minor/negligible significance.	None required.	Long-term, regional, neutral effect (indirect) of minor/negligible significance.	Not significant

Heritage Asset	Heritage Significance	Contribution of setting to heritage significance	Likely Significant Effect	Mitigation Measures	Likely Residual Effect	EIA Significance
	designed and built by Surveyor to the Customs, and rebuilt in part by Architect to the Board of Works.	association between Custom House and these listed features is noted in the list description for the latter, which states <i>'the ensemble as a whole constituting an outstanding survival of London's late-Georgian riverscape'</i> .				
<i>P: River wall, stairs and cranes, Custom House Quay (grade II*)</i>	The significance of this HA lies in its architectural interest (it was designed by engineer John Rennie), historic interest (as the quay serving the Custom House), and technological interest and rarity,	Their riverside setting contributes to their significance. The association between Custom House and these listed features is the main reason for the group value identified in list description: <i>'the ensemble as a whole constituting an outstanding survival of London's late-Georgian riverscape'</i> .	Long-term, regional, neutral effect (indirect) of minor/ negligible significance.	None required.	Long-term, regional, neutral (indirect) minor/ negligible significance.	Not significant
<i>Q: The Monument, Monument Street (grade I) (Also SM)</i>	The Monument's significance derives from its association with Wren and its historic interest as a memorial to the Great Fire of 1666.	The Monument has a modern setting, surrounded on all sides by late 20th / early 21st century office buildings, which do not contribute to its significance.	Long-term, regional, neutral effect (indirect) of moderate significance.	None required.	Long-term, regional, neutral effect (indirect) of moderate significance.	Significant
<i>Group (xxx) - Gracechurch Street and environs (grade II)</i>						
<i>No.2a, Eastcheap</i>	This has significance as a former bank of 1910-11, designed by Frank Sherrin.	It is located on the main road of Eastcheap, an aspect of its setting that makes a contribution to its heritage significance	Long-term, regional, neutral effect (indirect) of minor significance.	None required.	Long-term, regional, neutral effect (indirect) of minor significance.	Not significant

Heritage Asset	Heritage Significance	Contribution of setting to heritage significance	Likely Significant Effect	Mitigation Measures	Likely Residual Effect	EIA Significance
<i>Nos.39 and 40 (Credit Lyonnais) Lombard Street</i>	This has significance as a City of London bank from 1868.	The building lies on the highly trafficked Gracechurch Street, an aspect of its setting that makes a contribution to its heritage significance.	Long-term, regional, neutral effect (indirect) of minor significance.	None required.	Long-term, regional, neutral effect (indirect) of minor significance.	Not significant
<i>Nos.81 and 82 Gracechurch Street</i>	This has significance as a mid/late 19 th century office building	The building lies on the highly trafficked Gracechurch Street, an aspect of its setting that makes a contribution to its heritage significance.	Long-term, regional, neutral effect (indirect) of minor significance.	None required.	Long-term, regional, neutral effect (indirect) of minor significance.	Not significant
<i>Nos. 7 and 9 Gracechurch Street</i>	This has significance as a former bank and office block, built for the Hong Kong and Shanghai Banking Corporation by Trollope & Colls around 1913 to a design by W. Campbell-Jones.	The building lies on the highly trafficked Gracechurch Street, an aspect of its setting that makes a contribution to its heritage significance.	Long-term, regional, neutral effect (indirect) of minor significance.	None required.	Long-term, regional, neutral effect (indirect) of minor significance.	Not significant
<i>R: Leadenhall Market with subsidiary numbering, Gracechurch Street (grade II*)</i>	Leadenhall Market has significance as one of London's most historic markets. Its significance is also derived from its distinctive architecture by Sir Horace Jones.	The setting of the market has changed considerably since it was constructed and makes a limited contribution to its significance.	Long-term, regional, neutral effect (indirect) of minor significance.	None required.	Long-term, regional, neutral effect (indirect) of minor significance.	Not significant

Heritage Asset	Heritage Significance	Contribution of setting to heritage significance	Likely Significant Effect	Mitigation Measures	Likely Residual Effect	EIA Significance
<i>S: Church of St Peter, Cornhill (grade I)</i>	The significance of this church derives from its design by Wren and incorporation of earlier (medieval) fabric.	The setting of the churchyard, not visible from the street, contributes to its significance.	Long-term, regional, neutral effect (indirect) of minor significance.	None required.	Long-term, regional, neutral effect (indirect) of minor significance.	Not significant
<i>T: Church of All Hallows by the Tower, Byward Street, Great Tower Street, Tower Hill (grade I)</i>	The church has significance as the only London church with standing fabric of Anglo-Saxon vintage.	The small churchyard contributes to its significance, as do the church's railings and dwarf wall (those sections flanking Great Tower Street and Byward Street) - listed separately at grade II.	Long-term, regional, neutral effect (indirect) of minor significance.	None required.	Long-term, regional, neutral effect (indirect) of minor significance.	Not significant
<i>Group (xxxi) - Byward Street / Tower Hill Terrace (grade II)</i>						
<i>Wine Cellars at Nos 8 to 10 (consec) (Premises of Messrs Asher Storey) Tower Hill</i>	This has significance as mid-19 th century wine cellars	Its setting makes a limited contribution to its heritage significance.	Long-term, regional, neutral effect (indirect) of minor significance.	None required.	Long-term, regional, neutral effect (indirect) of minor significance.	Not significant
<i>Nos.8 - 10 Tower Hill</i>	These have significance as mid-19 th century vaults below the public terrace, with some remains still visible above ground.	Its setting makes a limited contribution to its heritage significance.	Long-term, regional, neutral effect (indirect) of minor significance.	None required.	Long-term, regional, neutral effect (indirect) of minor significance.	Not significant
<i>Railing and dwarf wall to Church of All Hallows by the Tower (those sections flanking Great</i>	These have significance as 18 th century walls to the Church of All	The separately listed Church of All Hallows by the Tower, Byward Street, Great Tower Street, Tower Hill (I) is	Long-term, regional, neutral effect (indirect) of minor significance.
