	Development Overview Planning Policy Framework Baseline Conditions Structure of the HIA Health Impact Assessment

## 1. Introduction

- 1.1 This Health Impact Assessment ('HIA') has been prepared by Savills (UK) Limited to accompany the planning application for the proposed development at Twickenham Riverside, Twickenham, in the London Borough of Richmond upon Thames.
- 1.2 Full planning permission is sought for the following proposed development at the Site, hereafter known as the 'Proposed Development:

"Demolition of existing buildings and structures and redevelopment of the site comprising residential (Use Class C3), ground floor commercial/retail/cafe (Use Class E), and public house (Sui Generis), boathouse locker storage, floating pontoon and floating ecosystems with associated landscaping, restoration of Diamond Jubilee Gardens and other relevant works."

- 1.3 In accordance with adopted London Plan Policy S2 and the Mayor of London's Social Infrastructure Supplementary Planning Guidance 2015 ('SPG'), this HIA seeks to identify opportunities for maximising potential health gains and minimising harm. The HIA also addresses inequalities and other determinants of health.
- 1.4 In accordance with the adopted London Plan (2021) and Social Infrastructure SPG, a desktop HIA has been applied to the proposals. This HIA largely follows the structure established by London's Healthy Urban Development Unit ('HUDU'). A completed HUDU checklist is also provided at Appendix A of this report.
- 1.5 This Health Impact Assessment continues under the following sections:
  - Section 2 outlines the Development Overview;
  - Section 3 outlines the relevant planning policy;
  - Section 4 establishes the baseline conditions;
  - Section 5 outlines the structure of the Health Impact Assessment;
  - Section 6 provides the detailed Health Impact Assessment; and
  - Section 7 concludes the Health Impact Assessment.

# 2. Development Overview

Site location

- 2.1 The Site is located by the River Thames at the northern embankment of Twickenham and lies within the administrative boundary of the London Borough of Richmond Upon Thames. The Site extends to approximately 1.4 hectares and comprises a mixture of vacant and derelict buildings and structures (remnants form the previous public swimming pool).
- 2.2 Figure 1 below shows the existing site plan.
- 2.3 This HIA supports the Proposed Development for the following description of development:

"Demolition of existing buildings and structures and redevelopment of the site comprising residential (Use Class C3), ground floor commercial/retail/cafe (Use Class E), and public house (Sui Generis), boathouse locker storage and floating pontoon with associated landscaping, restoration of Diamond Jubilee Gardens and other relevant works."

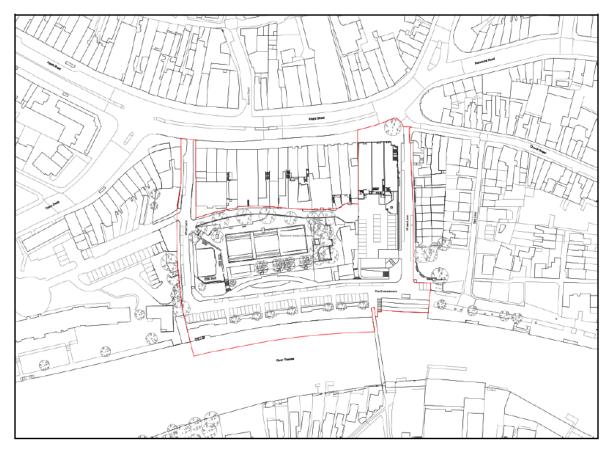

Figure 1: Existing Site Plan

## 2.4 Figure 2 below shows the Proposed Development for the Site.

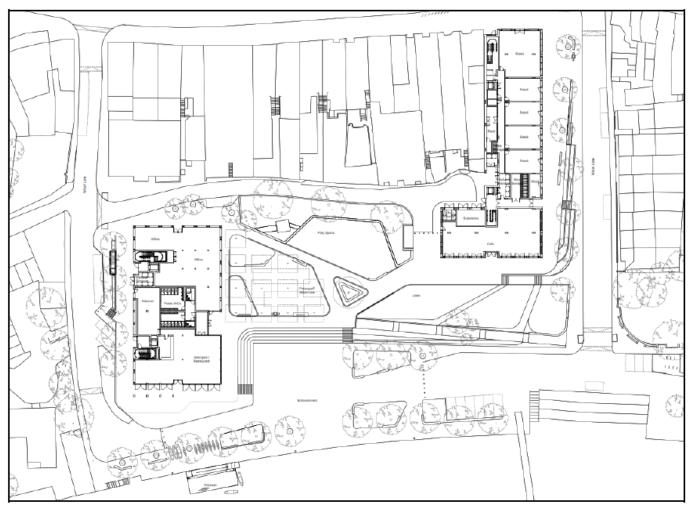

Figure 2: Proposed Development

# 3. Planning Policy Framework

3.1 This section considers the relevant planning policy framework that has informed the structure of this HIA supporting the Proposed Development.

### National Planning Policy Framework (NPPF) (2021)

- 3.2 The NPPF (2021) sets out the Government's planning policies for England. Paragraph 8 part (b) of the NPPF reinforces the planning system in playing an important role in promoting healthy communities and "beautiful and safe places". The NPPF supports the role planning for healthy and inclusive communities by supporting improvements to health, social and cultural wellbeing for all.
- 3.3 Chapter 8 of the NPPF promotes the creation of healthy and safe communities which:
  - Promotes social interaction, including opportunities for meetings between people who might not have otherwise come into contact with each other.
  - Is safe and accessible so crime and disorder do not undermine the quality of life or community cohesion in/surrounding a proposed development. The use of attractive, well-designed, clear pedestrian and cycle routes, high-quality public space and design features which foster a safe environment all exemplify this.
  - > Enables and supports healthy lifestyles, particularly where this addresses local health and wellbeing needs.

## The London Plan (2021)

- 3.4 The London Plan emphasises the importance of health in planning and includes Policy GG3 "Creating a Healthy City" which states that those involved in planning and development must assess the potential impacts of the proposed development on the mental and physical health and wellbeing of communities and the opportunities to reduce health inequalities.
- 3.5 The Mayor's Health Inequalities Strategy demonstrates the scale of London's health inequalities, which are shown to be significant and the need to reduce them is urgent. This includes improving healthy life expectations in more deprived areas and prioritising health in all of London's planning decisions through design that supports health outcomes and the assessment and mitigation of any potential adverse impacts of development proposals on health and health inequality.
- 3.6 Therefore, the Mayor will promote London as a healthy place for all from homes to neighbourhoods across the city as a whole by the "Healthy Streets Approach", which will improve health and reduce health inequalities at the heart of planning London's public space through:
  - Tackling London's inactivity crisis;

#### Twickenham Riverside

- > Improving air quality and reducing the other health impacts of living in a car-dominated city by planning street networks that work well for people on foot and on bikes; and
- Providing public transport networks that are attractive alternatives to car use which will also ensure that streets become more social spaces.
- 3.7 In order to achieve the aspirations of the Healthy Streets Approach and improve health, the potential impacts of development proposals and Development Plans on the mental and physical health and wellbeing of communities must be assessed in order to mitigate any potential negative impacts, maximise potential positive impacts, and help reduce health inequalities, for example through the use of HIA.

## Social Infrastructure SPG (2015)

- 3.8 The Social Infrastructure SPG states that a Health Impact Assessment is a practical decision-making tool which enables both positive and negative health and wellbeing impacts to be considered in an objective, consistent and systematic manner<sup>1</sup>.
- 3.9 The SPG distinguishes between the three different types of HIA, each of which will be used in a proportionate manner depending on the proposals at hand. These types are:
  - Full HIA: This comprises a detailed analysis of all potential health and wellbeing impacts. It is typically a demanding and time-consuming process, as well as resource-intensive.
  - Rapid HIA: This is a less resource-intensive and involves a more focused investigation of health impacts, usually taking a couple of weeks to complete the process.
  - ➤ Desktop HIA: This draws on existing sources of information, knowledge and evidence to prepare the impact assessment, typically using published checklists which have been developed for this purpose.

## Richmond Local Plan (2018)

- 3.10 Policy LP 30 states that planning has a crucial role in creating environments that enhance and improve an individual's health and wellbeing. The policy continues to promote healthy and active lifestyles and measures in order to reduce health inequalities.
- 3.11 According to the council's published validation checklist, a HIA must be submitted alongside all major development proposals. The submitted HIA should:
  - Be proportionate to the scale of the development proposal in question;
  - Identify and support positive elements of the proposals, such as active design, play space and adaptability for instance; and

<sup>1</sup> Page 60 of the SPG

## **Twickenham Riverside**

• Use other technical documents to draw specialist information from, such as the Environmental Statement or Design and Access Statement, for example.

#### Twickenham Riverside

## 4. Baseline Conditions

- 4.1 The Proposed Development lies in the southern part of Twickenham Town Centre within the London Borough of Richmond upon Thames, in South West London. The Office for National Statistics administers a census of the population of the United Kingdom every ten years, and the most recent census was in 2011.
- 4.2 As of 2011, there were 186,990 usual residents within the London Borough of Richmond upon Thames. In the 2011 census, 87.9% of the population of Richmond upon Thames considered themselves to have very good health and good health. On the other hand, 3.2% of the population considered themselves to be in bad and very bad health. The census of England as a whole stated that 81% considered themselves have very good and good health, therefore, LBRuT appears to be above the England average as a whole in terms of health outcomes.
- 4.3 In respect of long-term health problems or disabilities, 88.5% of the population said that their day-to-day activities were not limited by their health and 4.9% said their day-to-day activities were limited significantly. This was compared to England as a whole, whereby 82.4% of the population said that their day-to-day activities were not limited by their health and 8.3% said their day-to-day activities were limited significantly.

## 5. Structure of the HIA

Using an appropriate type of HIA

- 5.1 In accordance with the suggested approach set out in the Mayor of London's Social Infrastructure SPG, a Desktop HIA is considered the most appropriate for Twickenham Riverside. This is because the Proposed Development does not include a major infrastructure project nor does it fall within the Opportunity Area Planning Framework ('OAPF').
- To provide an appropriate level of assessment and in accordance with guidance in the Mayor's SPG<sup>2</sup>, the London Healthy Urban Development Unit (HUDU) Healthy Urban Planning Checklist April 2017 version has been drawn upon to inform the structure of this assessment. This checklist aims to promote healthy planning by ensuring that the health and wellbeing implications of local plans and major planning applications are consistently taken into account. A completed HUDU checklist is also provided at Appendix A of this report.

**Themes** 

- 5.3 In accordance with the HUDU Healthy Urban Planning Checklist, this HIA is divided into the following four themes:
  - > Healthy Housing assesses housing design, accessible housing, healthy living, and housing mix and type.
  - Active Travel examines the measures undertaken to promote walking and cycling, safety, connectivity, and minimising car use.
  - ➤ **Healthy Environment** scrutinises the construction, air quality, noise, contaminated land, open space, play space, biodiversity, local food growing, flood risk and overheating.
  - Vibrant Neighbourhoods considers healthcare services, education, access to social infrastructure, local employment and healthy workplaces, access to local food shops and public buildings and spaces.
- In accordance with the HUDU checklist guidance, it may be the case that some issues under the above mentioned themes will be more relevant to the development than others.
- In the subsequent section, this HIA provides information and an assessment of each theme and refers to relevant planning policy where appropriate.

<sup>2</sup> Page 62 of the SPG

#### Twickenham Riverside

## 6. Health Impact Assessment

## Theme 1: Healthy Housing

Healthy Design

- An assessment of the design in relation to health has been undertaken with a specific focus on the energy efficiency of the future homes and meeting standards for daylight, sound insulation, private space, and accessible and adaptable dwellings.
- The energy efficiency of homes has a significant impact on human health. The energy usage in homes contributes a significant proportion of the UK's total carbon emissions therefore contributing to global CO2 emissions. An Mechanical and Electrical Assessment has been produced by Skelly & Couch. The energy strategy for the development follows the GLA Energy Hierarchy of *Be Lean, Be Green* and *Be Seen*. Lean Passive Design, Lean Active Design, Clean Design and Green Design measures have been adopted and implemented, which results in a minimum on-site reduction of at least 35% over Baseline CO2 emissions, thereby meeting the relevant policies in the adopted Local Plan (2018 and 2020) and London Plan (2021).
- Daylight and sunlight has important health benefits; it has been shown to improve people's mood and reduce depression and stress-related symptoms. A Daylight and Sunlight Assessment has been undertaken by GIA, assessing the impacts on the surrounding buildings and the internal daylight and sunlight levels to the habitable rooms of the Proposed Development. The assessment has identified 29 neighbouring buildings as relevant for the daylight and sunlight assessment. While there are some breaches of guidance, the retained values are very high and considered to be reasonable in the context of the Proposed Development. The assessment also revealed that following the implementation of the Proposed Development, the majority of the surrounding properties will adhere to the Building Research Establishment ('BRE') Guidelines, thus ensuring good levels of daylight for future occupants.
- 6.4 With respect to proposed residential standards, the apartments range from studios to large 3-bedroom flats and have been designed to optimise daylight, natural ventilation and river views, with ample storage and external balcony space. The existing play area within the gardens will be re-provided and improved in a new location adjacent to the new café, offering more informal play opportunities for all ages designed within the gardens, such as petanque courts. These spaces will provide residents with opportunities to socialise and interact. This will in turn improve social cohesion between residents.
- In terms of noise, the Noise Assessment concluded that the Proposed Development is not expected to generate significant volumes of traffic or other noticeable or intrusive noise sources and there will not be an adverse impact on health or quality of life. To ensure high-quality developments are created, a glazing strategy has been provided which achieves both ventilation and internal ambient noise level requirements of LAeq daytime 35 dB, LAeq night-time of 30 dB and LAmax night-time of 45 dB in all residential bedroom/spaces of the Proposed Development. The Development is unlikely to reduce the tranquillity value of the area and will increase local access to areas of relative tranquillity including by the riverside and in Diamond Jubilee Gardens. Internal design advice has been provided regarding internal noise transmission between the commercial units and the residential dwellings along with the required sound insulation between each residential dwelling.

#### Twickenham Riverside

An air quality assessment has been carried out to assess both construction and operational impacts of the Proposed Development, which shows that through good site practice and the implementation of suitable mitigation measures, the impact of dust and PM10 releases may be effectively mitigated and the resultant impacts are therefore considered to be negligible. Furthermore, it considered that the Proposed Development is air quality neutral and has negligible impact with regards to new exposure to air quality.

#### Inclusive Access

- In terms of access, 90% of apartments will meet Building Regulations requirement Part M4(2) Category 2: Accessible and adaptable dwellings standards and the remaining 10% will include accessible apartments to M4(3) Category 3 wheelchair user dwelling standards in accordance with London Plan Policy D7. These standards will ensure accessible and adaptable accommodation for everyone; young people, older people, individuals with a temporary or permanent physical impairment, and allow residents to stay in their home without barriers arising related to their disabilities. They also enable flexibility, visitability and future-proofing.
- The Diamond Jubilee Gardens provide a large open space to the centre of the Site with terraced steps leading down to a new Market Square which can accommodate events such as performances and farmers' markets.
- 6.9 Provisions to ensure an accessible environment include:
  - Ensuring pedestrian and cycling routes as inclusive as possible;
  - Animating street frontages of building to provide interest, passive surveillance, safety and convenience for all users, especially older and disabled people, children and their carers;
  - Provision of mixed uses on a centrally located, accessible town centre site thereby reducing travel distances
    to work and local services which are especially critical for older and disabled people with limited mobility;
  - Optimise the locations of vertical circulation within the new buildings and horizontal connections; and
  - Promoting the concept of inclusive design within the design team.

## Healthy Living

The dwellings within the Proposed Development have been designed to comply with the relevant London Plan, London Plan Housing SPG and Building Regulations requirements which include minimum standards for bedrooms, storage and internal areas. The majority of new dwellings (64%) benefit from dual aspect.

#### Housing Mix

6.11 It is important for an appropriate housing mix to be provided within new developments in order to create mixed and socially inclusive communities which have a positive impact on the physical and mental health of the residents. Policy H10 of the London Plan states that schemes should generally consist of a range of unit sizes at different price points.

#### Twickenham Riverside

The housing mix of the Proposed Development is shown in Table 1 below. The Proposed Development comprises 50% affordable housing by habitable room, significantly contributing towards LBRuT's affordable housing provision across the borough and overall housing target. The development will provide high quality homes to people on the LBRuT's housing waiting list. The Proposed Development incorporates a balanced mix of unit sizes, ensuring a mixed community and improving social cohesion between residents.

Table 1: Accommodation Schedule

Tenure	Number of bedrooms				
	Studio (1p)	1 bed (2p)	2 bed (3p)	2 bed (4p)	3 bed
Market	5	9	3	7	0
Affordable	0	11	3	6	1
Total	5	20	6	13	1

## Theme 2: Active Travel

## Promoting Walking & Cycling

- 6.13 Cycle parking will be in a location that people feel safe using at all times of the day and is visible, accessible, well-overlooked and well lit. The proposed cycle parking will be located at the main entrances and stopping points in the Site at the top of Water Lane, the entrance to the gardens along Wharf Lane, and at either end of the river promenade. The 18 Sheffield stands will provide external parking for 36 bicycles and 87 internal parking spaces. In consideration of the LBRuT proposed removal of the large public car park in the area, cycling should become significantly safer as well.
- With respect to walking, the Proposed Development will provide improved north south and east west along desire lines between the site and the town centre and along the river, traversing through the gardens. A safer pedestrian environment results from a significant reduction in parking and provision of active ground floor uses with opportunities for natural surveillance.
- The Site is located within a walking distance of 100 metres of the main shopping centre of the Twickenham Town Centre, providing short and easy access to a range of local services and facilities.

#### Connectivity

- The Site promotes the use of cycling as a result of the provision of Sheffield stands and accessible, safer cycling routes. In addition to this, the Embankment and Wharf Lane form part of a signed advisory cycle route. The intention of this is to retain the same route, which will be suitable for cycling, improving connectivity for cyclists. The cycling environment along Water Lane and Wharf Lane will be enhanced, thereby improving Site accessibility and connectivity for cyclists connecting from King Street / Church Street.
- 6.17 The Site is within 500 metres walking distance from Twickenham Train Station. The station is located within London Fare Zone 5 and is operated by South Western Railway, benefiting from services via London Waterloo, Kingston, Reading and Windsor and Eton Riverside. Regular train services operated by South Western Railway connect London

#### Twickenham Riverside

Waterloo to Twickenham in approximately 34 minutes, Clapham Junction to Twickenham in approximately 26 minutes, Reading to Twickenham in approximately 1 hour and Windsor to Twickenham in approximately 30 minutes.

Minimising Car Use

- Through the provision of Sheffield stands, accessible and safe routes for cyclists and pedestrians and a sustainable location, within close proximity to transport links such as bus services and Twickenham train station, the use of sustainable transport modes will be encouraged.
- The Proposed Development will be car-free with the exception of spaces provided for Blue Badge holders, and spaces re-provided for the use of tradespeople and visitors associated with local stakeholders' needs. Additionally, the Proposed Development will seek to provide 2no. spaces along Water Lane to be assigned by the LBRuT as it sees fit. The Proposed Development will comprise 12no. car parking spaces and 1no. motorcycle space, distributed as follows:
  - Six loading bays along the Embankment, which will remain dedicated to Eel Pie Island servicing activity;
  - Two parking bays provided on Wharf Lane, also primarily for the use of Eel Pie Island tradespeople and visitors;
  - One bay for disabled badge holders along the service road;
  - Two disabled Blue badge holders along Water Lane;
  - Two on-street parking spaces which can be allocated by the LBRuT in any way they see fit. These bays are anticipated to be retained as P&D for general visitors of the area; and
  - One-Motorcycle only bay.

## Theme 3: Healthy Environment

## Construction

- 6.20 The Site will register with the Considerate Constructors Scheme, which is a voluntary scheme in which the constructions sites agree to abide by the Code of Considerate Practice, designed to encourage best practice beyond statutory requirements.
- The CCS is designed to encourage environmentally and socially considerate ways of working, to reduce any adverse impacts arising from the construction process. As commonly known, the aims are as follows:
  - Enhancing the appearance;
  - Respecting the community;

#### Twickenham Riverside

- Protecting the environment;
- Securing everyone's safety; and
- Caring for the workforce.
- 6.22 Best practice will be employed in respect of dust and debris control from the construction activities. The Control of Dust and Emissions During Construction and Demolition SPG (adopted 2014) at London level provides guidance on best practices to reduce emissions of dust from construction and demolition activities in sites across London. In accordance with this SPG and other relevant legislation, policy and guidance on the matter including London Plan Policies D13, D14 and SI 10, it is anticipated that the Proposed Development will introduce measures to reduce the impact of construction such as noise, vibration, air pollution and dust, including the following, but not limited to:
  - Minimising dust-generating activities;
  - Using water as dust suppressant where applicable;
  - Re-vegetating earthworks and exposed areas as early as possible during the construction process;
  - Using effective water suppression during demolition operations;
  - Removing materials that have a potential to produce dust from the Site as soon as possible, unless being re-used on Site;
  - Recording all dust and air quality complaints, identifying cause, taking appropriate measures to reduce emissions in a timely manner, and recording measures taken;
  - Regulating movement of construction traffic route; and
  - Banning bonfires.
- The above measures will ensure that the impact of the construction process on the health of the local environment will be effectively minimised and managed.

Noise

- Reducing noise pollution helps to improve the quality of life for residents. Noise exposure indirectly affects physical health and wellbeing by disrupting sleep, causing stress and increasing the risk of high blood pressure. Mental health and wellbeing can also be affected, causing disturbance, irritation, nuisance and dissatisfaction.
- 6.25 An Acoustic Report has been undertaken by Tetra Tech, allowing the assessment of daytime and night-time noise levels likely to be experienced by the future residents of the Proposed Development, including an analysis on noise levels in all residential bedroom/spaces of the scheme. For sensitive bedrooms and living rooms with facades

#### Twickenham Riverside

adjacent to the King Street will feature enhanced glazing, and at all other locations and facades will feature a standard double glazing to reduce noise levels.

Open Space

- Access to open space can have positive impacts on health and wellbeing. The Proposed Development includes open space in the form of the Diamond Jubilee Gardens which will provide a large open space with areas for play, games, relaxation and social interactions.
- 6.27 The Proposed Development re-provides and improves the existing play area within the gardens in a new location adjacent to the new café. As well as this new play area there are other informal play opportunities for all ages designed within the gardens, such as the grass lawns and slope, chess tables and petanque courts. The proposed play area is 343 sqm, which exceeds the total requirement of 335.6 sqm of play space for the Proposed Development.
- The location of the Site is such that there are also several other areas of open green and blue space within close proximity, including the River Thames, Marble Hill Park, Hams Land and Twickenham Green.

Play Space

6.29 Participation in regular physical activity is important for healthy growth and development in children and young people.

As described above, the Proposed Development includes a new play space in the centre of the Site adjacent to the new café for people of all ages and is in close proximity to Champion's Wharf Play Beach and Marble Hill Playcentres.

**Biodiversity** 

- Access to nature and biodiversity can have positive effects on mental health and wellbeing. With new development comes opportunity to enhance ecological value and create new habitats. The development Site has been previously used for development and is predominantly covered in a mixture of vacant and derelict structures associated with the former swimming pool, retail and office use, a private car park and areas of public amenity space.
- 6.31 The Proposed Development will introduce biodiversity measures that aims to reconnect the Site with the river and provide a variety of spaces for different uses and activities, from quiet to sociable, and informal to formal gatherings, including, but not limited to:
  - Existing trees retained including oak tree;
  - Planted terraces:
  - Café with outdoor seating;
  - Floating wetlands;
  - · Rain garden;

#### Twickenham Riverside

- Hornbeam trees and planted buffer; and
- Accessible sloped path to gardens.
- These measures are some of what will be provided in the Proposed Development, which will create ecological and psychological benefits for people to enjoy whilst using spaces for activities. The biodiverse planting palette seeks to provide a wide variety of habitat opportunities. Berry-producing trees are proposed where appropriate to encourage bats and support birds, and there is also opportunity to enhance the ecology along the river wall with the provision of hanging fish walls or floating biodiverse islands. Particular attention will be paid to improving habitats and biodiversity along the river edge.
- In addition, Diamond Jubilee Gardens is designed as a lush green space that wraps around the play area and two petanque courts. Further details of design measures for the enhancement of biodiversity in the Site can be found in the DAS. Residential units have been designed with ample storage and external balcony space and an additional private roof garden space will be provided.

#### Local Food Growing

6.34 Providing space for local food growing helps promote more active lifestyles, better diets and social benefits. The scale of the Site is such that providing a significant area for local food growing is unlikely to be feasible. However, as discussed in previous sections, the Proposed Development will provide residential units with external balcony and a private roof garden space, which can be used for food growing.

## Flood Risk

- Flooding can have significant effects on people's mental health and wellbeing that may continue over a prolonged period of time. People can become distressed and the cleaning up process after the event causing increased stress and strain. It is often likely that increasing development densities and building coverage coupled with more frequent extreme weather events will increase urban flood risk. It is, therefore, important that flood risk and measures to reduce the risk in new development are assessed.
- According to the Environment Agency's Flood Map shown in Figure 4 below, the Proposed Development partially lies in a medium flood risk zone (Flood Zone 2) and high flood risk zone (Flood Zone 3) but benefits from flood defence. The proposed design will remove the existing flood defence and provide new flood defence structures around the Proposed Development. The flood defence wall will provide protection equal or greater than the Thames Estuary 2100 defence level of 6.90m. Through the introduction of a new flood defence wall, the topography of the site changes such that the most vulnerable, residential uses are located in the part of the site least at risk from flooding in Flood Zone 1.

Figure 3: Flood Zone extents in the Proposed Development

- A site-specific flood risk assessment has been undertaken and demonstrates that the development is permitted with respect to flood risk in line with NPPF policy. The proposal will have a positive impact on the risk of surface water flooding through the incorporation of appropriate Sustainable Drainage Systems (SuDS). With respect to SuDS, surface water runoff which cannot drain by gravity directly into the River Thames is proposed to be captured and discharged into the existing Thames Water surface water network. The invert level of the Thames water pipe is lower than the daily high tides. Therefore, the design shall provide sufficient attenuation on site to prevent flooding as a result of choking or backflow from the downstream connection.
- 6.38 An allowance of 40% additional rainfall has been made for the effects of climate change in accordance with the NPPF.

## Overheating

6.39 Climate change effects associated with higher average summer temperatures are likely to intensify the urban heat island effect and result in discomfort and excess summer deaths amongst vulnerable people. Therefore, it is important to minimise the risk of summer overheating so as to ensure that homes are appropriately adapted to the effects of climate change and remain comfortable to occupy in the future.

#### Twickenham Riverside

- The units will incorporate a number of active and passive measures to reduce the risk of overheating and eliminate the need for active cooling. These include glazing and openings which are designed to limit solar heat gains in summer months when undesirable; a glazing-to-wall ratio of 25-40% is typically recommended for each orientation, with overhang shading for south elevations and vertical shading for east and west provided by set-back balcony windows and doors, as well as balcony overhangs.
- Furthermore, the units in each apartment will provide continuous mechanical ventilation and a background ventilation rate in line with Part F minimum whole dwelling ventilation rates. Corner units where higher solar gains are likely will make use of openings on all elevations to ensure good natural cross-ventilation; and it is proposed that the commercial and retail units will also utilise large openings on all elevations to maximise natural ventilation, thus reducing the risk of overheating.
- 6.42 Adjacent vegetation will provide shading to provide natural evaporative cooling to spaces.

## Theme 4: Vibrant Neighbourhoods

Health Services

- 6.43 Poor access and quality of healthcare services exacerbates ill health, making effective treatment more difficult. The provision of support services and advice on healthy living can prevent ill health. The LBRuT website provides information on the support services and advice available to residents of the Borough including relating to the following:
  - Adults and older people;
  - Carers;
  - Children and family care;
  - Community transport services;
  - Disabilities;
  - Drug or alcohol addiction;
  - Food;
  - Fostering, adopting and looked after children;
  - Help and support to quit smoking;
  - Mental health services;
  - Occupational therapy and specialist equipment;

#### Twickenham Riverside

- Residential and nursing care; and
- Support to live at home.
- An NHS Choices search has been undertaken and is included in **Appendix 2**. This search reveals a significant level of access to healthcare across the Site and surrounding. The search on NHS Choices reveals that the nine GP practices are within 1 mile of the Site, which suggests a significant level of access to health services. In addition, three dentist practices and eleven pharmacies are within 1 mile of the Site, which also provides local residents with good access to dental services and medication. There are four hospitals within 2 miles of the Site, which ensures good access for local residents with regard to medical treatment and emergency services. Therefore, the Proposed Development will not result in an additional impact on these healthcare facilities.

#### Education

- The Proposed Development is located such that several educational establishments are within walking distance, including the following:
  - St Mary's Church of England Primary School;
  - Orleans Park School;
  - Twickenham Primary Academy;
  - Archdeacon Cambridge's Church of England Primary School;
  - Trafalgar Junior School;
  - St Richard Reynolds Catholic High School;
  - St Richard Reynolds Catholic Primary School;
  - St Catherine's School; and
  - Radnor House.
- The proposed unit is biased towards smaller units that produce a lower child yield. Where family sized affordable homes are provided, residents are likely to already be living within the borough meaning that there will be no additional impact on these existing educational facilities.

### Local Employment

6.47 The construction process will be expected to create employment and supply opportunities to local businesses. The proposed office space, public house/restaurant and retail frontage will help strengthen the high street offer, drawing residents down from the high street and providing employment opportunities.

#### Twickenham Riverside

## Access to Local Food Shops

- 6.48 Hot food takeaways and similar outlets selling fast food can harm the vitality and viability of local centres and undermine attempts being made in a locality to promote the consumption of healthy food, particularly where schools are located nearby.
- The Proposed Development does not include any hot food takeaways and fast food restaurants.

Public Realm

- The public realm has an important role to play in promoting walking and cycling, activity and social interaction and can affect people's sense of place, security and belonging.
- The Proposed Development will maintain the public realm in the centre of the Site, including the provision of opportunities for communal activity at lower levels, including places to eat, exercise, shop and meet will increase community interaction, opportunities for physical activity and reduce isolation often experienced especially by older and disabled people. CCTV coverage will be provided for public amenity spaces and connections to council-run CCTV system to enhance safety. Additionally, street frontages will be animated, further stimulating interest, passive surveillance, safety and convenience for all users, and the design principles embedded within the Proposed Development will deliver improvements to the appearance and orientation of public realm, reinforcing the Site's sense of identity.

#### Twickenham Riverside

## 7. Conclusions

- 7.1 It is considered through this desktop HIA that the Proposed Development through its design and siting in a well-connected town centre location will benefit the health of the future occupants as well as local residents.
- 7.2 This HIA considers the following themes:
  - Healthy Housing The development provides high-quality homes including significant provision of affordable housing with a high level of accessibility in accordance with London Plan policies and a good mix of units in terms of size, type and tenure, facilitating social cohesion between residents and thus a mixed community.
  - Active Travel The Proposed Development will facilitate active travel and enhance the modes of sustainable transport including the provision of Sheffield stands to support cycling in the Site and enhance pedestrian access by improved public realm design and orientation and minimise car use.
  - ➤ **Healthy Environment** A range of measures included in the Proposed Development will reduce negative impact on the environment, improve air quality, enhance biodiversity, reduce flood risk and prevent overheating.
  - Vibrant Neighbourhoods The proposed development is ideally located for access to local services, public realm, play space, employment and amenities, making a positive contribution to the vibrancy and health of the wider neighbourhood.
- 7.3 In accordance with relevant guidance, a Healthy Urban Development Unit (HUDU) Healthy Urban Planning Checklist has been completed and is attached in **Appendix 1**.

# **Appendix 1: Healthy Urban Planning Checklist**

		Theme 1: Healthy	/ Housing	
Issue	Key questions	Yes /No / Not relevant Comment	Policy requirements and standards	Why is it important
Healthy Design	Does the proposal meet all the standards for daylight, sound insulation, private space and accessible and adaptable dwellings?	Yes – daylight and sound insulation studies have formed part of the design process applying relevant guidance from Building Regulations to demonstrate acceptable results in both internal daylight levels and airborne sound insulation values.  Accessible and adaptable dwellings: 90% of the new dwellings will be designed and built to Building Regulations Approved Document M4(2) standards, with 10% to Part M4(3).	London Plan Policy SI 2 Minimising greenhouse gas emissions and Housing SPG Standard 35: zero carbon residential buildings from 2016 and non-domestic buildings from 2019  Housing SPG Standard 29 on dual aspect and Standard 32 on daylight and sunlight Housing SPG Standard 4 on communal open space, supported by London Plan Policy G4  Housing SPG Standards 26 and 27 on minimum provision of private (amenity) open space  London Plan Policy D7 Accessible Housing and Housing SPG Standard 11 on access require 90% of new homes meet Building Regulation M4(2) 'accessible and adaptable dwellings'  Sound insulation and noise – London Plan Policy D14 and Housing SPG Standard 30 on noise  Housing SPG Standards 8 and 9 on entrance and approach	Satisfying these standards can help meet carbon dioxide emissions targets.  Good daylight can improve the quality of life and reduce the need for energy to light the home.  The provision of an inclusive outdoor space, which is at least partially private, can improve the quality of life. Improved sound insulation can reduce noise disturbance and complaints from neighbours.

Accessible housing	Does the proposal provide accessible homes for older or disabled people?  Does the proposal ensure that every non-ground floor dwelling is accessible by a lift that can accommodate an ambulance trolley?	Yes – 10% of the new dwellings will be designed and built to Building Regulations Approved Document M4(3) standards.	London Plan Policy D7 Accessible Housing and Housing SPG Standard 11 on access require 10 per centall new housing to be designed to be wheelchair accessible or easily adaptable such that they meet Building Regulation M4(3) 'wheelchair user dwellings'  Housing SPG Standards 15 and 16 relate to the provision of lifts. Good practice standard - the provision of an ISO standard 13 person lift in a configuration which can accommodate a trolley bed (see Department of Health Technical Memorandum 08-02: Lifts)	Accessible and easily adaptable homes can meet the changing needs of current and future occupants.  One of the main methods of transportation of immobile patients is by trolley bed.  Non-ground floor dwellings should be accessible by a lift that can accommodate an ambulance trolley.
Healthy living	Does the proposal provide dwellings with adequate internal space, including sufficient storage space and separate kitchen and living spaces?  Does the proposal encourage the use of stairs by ensuring that they are well located, attractive and welcoming?	The dwellings within the Proposed Development have been designed to comply with the relevant London Plan, London Plan Housing SPG and Building Regulations which include minimum standards for bedrooms, storage and internal areas. The majority of units (64%) benefit from dual aspect.  With respect to stairs, the Proposed Development will ensure the stairs are accessible, welcoming, well located and attractive.	London Plan Policy D6 (Table 3.3 - minimum space standards for new dwellings) and Housing SPG Standard 24 on dwelling space standards  Housing SPG Standard 25 - dwellings should accommodate the furniture, access and activity space requirements relating to the declared level of occupancy  Also, Housing SPG Standard 28 on privacyand Standard 31 on ceiling heights  Housing SPG Standards 12 to 16 relate to shared internal circulation, cores and lifts.	Sufficient space is needed to allow for the preparation and consumption of food away from the living room to avoid the 'TV dinner' effect.  Rather than having lifts at the front and staircases at the back of buildings, it is preferable to have them located at the front to encourage people that can to use them.

Housing mix and affordability	Does the proposal provide affordable familysized homes?	Yes – a broad range of housing is provided on site, including a mix of one to three bedroom apartments.	London Plan Policy H4 Delivering Affordable housing The Mayor's Homes for Londoners: Affordable Homes Programme 2016-21 is a £3bn fund to help start building at least 90,000 affordable homes by 2021	The provision of affordable housing can create mixed and socially inclusive communities. The provision of affordable family sized homes can have a positive impact on the physical and mental health of those living in overcrowded, unsuitable or temporary accommodation.  Both affordable and private housing should be designed to a high standard ('tenure blind').
		Theme 2: Activ	ve Travel	
Issue	Key questions	Yes / No / Not relevant Comment	Policy requirements and standards	Why is it important
Promoting walking and cycling	Does the proposal promote cycling and walking through measures in a travel plan, including adequate cycle parking and cycle storage?	Yes – 18 Sheffield stands will be provided for 36 bicycles. Moreover, 87 cycle parking spaces will be provided internally.	London Plan Policy T2 Healthy Streets  London Plan Policy T4 Travel plans  London Plan Policy T5 Cycling  London Plan Policies S5 and GG2  Walking  London Plan Policy T5 and Table 10.2  Cycle parking minimum standards  Housing SPG Standards 20 and 21 on	A travel plan can address the environmental and health impacts of development by promoting sustainable transport, including walking and cycling.  Cycle parking and storage inresidential dwellings can encourage cycle participation.

			cycle storage	
Safety	Does the proposal include traffic management and calming measures and safe and well lit pedestrian and cycle crossings and routes?	N/A – The scale of the Proposed Development is such that such measures are not relevant.	London Plan Policy T5 Cycling  London Plan Policies S5 and GG2  Walking	Traffic management and calming measures and safe crossings can reduce road accidents involving cyclists and pedestrians and increase levels of walking and cycling.
Connectivity	Does the proposal connect public realm and internal routes to local and strategic cycle and walking networks and public transport?	Yes – The site is will be publicly accessible at all times. Through improvements to the riverfront environment and Water Lane and Wharf Lane, the Proposed Development enhances connectivity with the town centre and delivers legible and accessible routes along desire lines between King Street and the river. Inclusive cycle routes will be provided and safe and convenient walking routes and crossing will be created, which helps to connect the public realm to the Site.	London Plan Policy T5 Cycling London Plan Policies S5 and GG2 Walking Green Infrastructure: The All London Green Grid SPG (March 2012) Transport for London Legible London. Transport for London Bus Service Planning Guidelines.	Developments should prioritise the access needs of cyclists and pedestrians. Routes should be safe, direct and convenient and barriers and gated communities should be avoided.  Developments should be accessible by public transport.
Minimising car use	Does the proposal seek to minimise car use by reducing car parking provision, supported by the controlled parking zones, car free	Yes – the Site is situated in a highly sustainable location with close proximity to public transport links. Sheffield stands will be provided to encourage cycling and minimise car use.	Housing SPG Standards 17 to 19 on car parking provision  London Plan Policy T6 Car Parking	Space for pedestrians and cyclists should be given priority over commercial and private vehicles. Maximum car parking levels allows for provision to be reduced as far as practicable.

	development and car clubs?			Car clubs can be effective in reducing car use and parkingdemand at new residential developments.
		Theme 3: Healthy E	Environment	
Issue	Key questions	Yes / No / Not relevantComment	Policy requirements and standards	Why is it important
Construction	Does the proposal minimise construction impacts such as dust, noise, vibration and odours?	Yes – the Proposed Development will introduce measures that minimise the impact of construction including dust, noise, vibration, air pollution and odours, including banning bonfires, regulating the movement of construction traffic route and using effective water suppression during demolition operations.  The site will also be registered with the Considerate Constructors Scheme.	London Plan Policy SI 7 Reducing waste and supporting the circular economy  The Control of Dust and Emissions During Construction and Demolition SPG (July 2014)  Housing SPG Standard 34 on environmental performance	Construction sites can have anegative impact on an area and can be perceived to be unsafe. Construction activity can cause disturbance and stress, which can have an adverse effect on physical and mental health.  Mechanisms should be putin place to control hours of construction, vehicle movements and pollution.  Community engagement before and during construction can help alleviate fears and concerns.
Air quality	Does the proposal minimise air pollution caused by traffic and energy facilities?	Measures to encourage cycling such as the provision of Sheffield stands and car-free residential units will reduce car usage and in turn reduce pollution from traffic. In terms of	London Plan Policy SI 1 Improving air quality.  At least 'air quality neutral' - Housing SPG Standard 33 on air quality	The long-term impact of poor air quality has been linked to life-shortening lung and heart conditions, cancer

		traffic emissions, future occupants of the Site would not be exposed to PM10 concentrations above the relevant air quality objectives through the impact of the development with regards to new exposure to this pollutant is considered to be negligible. Through good site practice and the implementation of suitable mitigation measures, the impact of dust and PM10 releases may be effectively mitigated and the resultant impacts are therefore considered to be negligible. Furthermore, it considered that the Proposed Development is air quality neutral and has negligible impact with regards to new exposure to air quality.	London Plan Policy G5 Urban greening	and diabetes.
Noise	Does the proposal minimise the impact of noise caused by traffic and commercial uses through insulation, site layout and landscaping?	Yes - For sensitive bedrooms and living rooms with facades adjacent to the King Street will feature enhanced glazing, and at all other locations and facades will feature a standard double glazing to reduce noise levels.	London Plan Policy D14 Noise Limit the transmission of noise to sound sensitive rooms - Housing SPG Standard 30 on noise	Reducing noise pollution helps improve the quality of urban life.
Open space	Does the proposal retain or replace existing open space and in areas of	The Proposed Development will provide 7,200 sqm of public open space (uplift of 2,834 sqm). The focal point of the public	London Plan Policy G4 Open space  London Plan Policy G6 Biodiversity and access to nature	Access to open space has a positive impact on health and wellbeing. Living close to areas of green space,

	deficiency, provide new open or natural space, or improve access to existing spaces?  Does the proposal set out how new open space will be managed and maintained?	open space will be centred around improved re-provided Diamond Jubilee Gardens, with two further distinct spaces: the Town Square and the River Promenade. The Proposed Development includes public realm improvements to the Embankment where a new town square with amphitheatre-style terraced seating will become a new flexible, civic space for the town centre suitable for a range of uses and pop-up events. The Diamond Jubilee Gardens will provide space for games, play and rest and relaxation	Housing SPG Standards 3 and 4 on communal and public open space	parks, woodland and other open space can improve physical and mental health regardless of social background.  To maintain the quality and usability of open spaces an effective management and maintenance regime should be put in place.
Play space	Does the proposal provide a range of play spaces for children and young people?	The Proposed Development includes a dedicated play area for children and young people in the centre of the Site adjacent to the new café for people of all ages and is in close proximity to Champion's Wharf Play Beach and Marble Hill Playcentres. The proposed play area is 343 sqm, which exceeds the total requirement of 335.6 sqm of play space for the Proposed Development.	London Plan Policy S4 Play and informal recreation  Shaping Neighbourhoods: Play and Informal Recreation SPG (Sept 2012) - quantity Benchmark Standard of a minimum of 10 square metres per child regardless of age (4.24) and accessibility to play space Benchmark Standard (Table 4.4)  Housing SPG Standard 5 on play space	Regular participation in physical activity among children and young people isvital for healthy growth and development.  The location of play spaces should be accessible by walking and cycling routes that are suitable for children to use.
Biodiversity	Does the proposal contribute to nature conservation and biodiversity?	Yes – the Proposed Development will introduce a series of biodiversity measures including tree planting, retaining existing trees and providing rain gardens. These	London Plan Policy G6 Biodiversity and access to nature Housing SPG Standard 40 on	Access to nature and biodiversity contributes to mental health and wellbeing.

		measures will contribute to nature conservation and biodiversity of the Site.	ecology	New development can improve existing, or create new, habitats or use design solutions (green roofs, living walls) to enhance biodiversity.
Local food growing	Does the proposal provide opportunities for food growing, for example by providing allotments, private and community gardens and green roofs?	The scale of the Site is such that providing a significant area for local food growing is unlikely to be feasible. However, as discussed in previous sections, the Proposed Development will provide residential units with external balcony and a private roof garden space, which can be used for food growing.	London Plan Policy G5 Urban greening London Plan Policy G8 Food growing London Plan Policy G1 Green infrastructure	Providing space for local food growing helps promote more active lifestyles, better diets and social benefits.
Flood risk	Does the proposal reduce surface water flood risk through sustainable urbandrainage techniques, including storing rainwater, use of permeable surfaces and green roofs?	Yes - A site-specific flood risk assessment has been undertaken and demonstrates that the development is permitted with respect to flood risk in line with NPPF policy. The proposal will have a positive impact on the risk of surface water flooding through the incorporation of appropriate Sustainable Drainage Systems (SuDS). With respect to SuDS, surface water runoff which cannot drain by gravity directly into the River Thames is proposed to be captured and discharged into the existing Thames Water surface water network. The invert level of the Thames water pipe is lower than the	London Plan Policy G1 Green infrastructure  London Plan Policy SI 13  Flooding and drainage - Housing SPG Standards 38 and 39	Flooding can result in risks to physical and mental health. The stress of being flooded and cleaning up can have a significant impact on mental health and wellbeing. It is likely that increasing development densities and building coverage coupled with more frequent extreme weather events will increase urban flood risk.

		daily high tides. Therefore, the design shall provide sufficient attenuation on site to prevent flooding as a result of choking or backflow from the downstream connection. An allowance of 40% additional rainfall has been made for the effects of climate change in accordance with the NPPF.		
Overheating	Does the design of buildings and spaces avoid internal and external overheating, through use of passive cooling techniques and urban greening?	Yes – the units will incorporate a number of active and passive measures to reduce the risk of overheating and eliminate the need for active cooling. These include glazing and openings which are designed to limit solar heat gains in summer months when undesirable.  The units in each apartment will provide continuous mechanical ventilation and a background ventilation rate in line with Part F minimum whole dwelling ventilation rates. Corner units where higher solar gains are likely will make use of openings on all elevations to ensure good natural crossventilation; and it is proposed that the commercial and retail units will also utilise large openings on all elevations to maximise natural ventilation, thus reducing the risk of overheating.	London Plan Policy SI 4 Managing heat risk  London Plan Policy G5 Urban greening  London Plan Policy G1 Green infrastructure  Overheating - Housing SPG Standards 36.	Climate change with higheraverage summer temperatures is likely to intensify the urban heat island effect and result in discomfort and excess summer deaths amongst vulnerable people.  Urban greening - tree planting, green roofs and walls and soft landscaping can help prevent summer overheating.

Theme 4: Vibrant Neighbourhoods				
Issue	Key questions	Yes / No / Not relevantComment	Policy requirements and standards	Why is it important
Health services	Has the impact on healthcare services been addressed?		London Plan Policy S2 Health and social care facilities  NHS London Healthy Urban Development Unit Planning Contributions Tool (the HUDU Model)  Social Infrastructure SPG (2015)	Poor access and quality of healthcare services exacerbates ill health, making effective treatment more difficult. The provision of support services and advice on healthy living can prevent ill health.
Education	Has the impact on primary, secondary and post-19 education been addressed?	Yes – the Site is well served by nearby educational establishments.	London Plan Policy S3 Education and childcare facilities.	Access to a range of primary, secondary and post-19 education improves self- esteem, job opportunities and earning capacity.
Access to social infrastructur e	Does the proposal contribute to new social infrastructure provision that is accessible, affordable and timely?  Have opportunities for multi-use and the co-location of services been explored?	The Proposed Development will provide flexible recreation space to reflect the mixed-use character of the commercial floorspace within the Site and an play area in the centre of the Site to promote a positive experience for children and young people's recreational activities and enable them to utilise outdoor activities.	London Plan Policy S1 Developing London's social infrastructure  Social Infrastructure SPG (2015)	Good access to local servicesis a key element of a lifetime neighbourhood and additional services will be required to support new development. Not doing so will place pressure on existing services.  Future social infrastructure requirements are set out in Borough infrastructure plans and developments will be expected to contribute towards additional services

# Health Impact Assessment

				and facilities.
Local employment and healthy workplaces	Does the proposal include commercial uses and provide opportunities for local employment and training, including temporary construction and permanent 'end-use' jobs?  Does the proposal promote the health and wellbeing of future employees by achieving BREEAM health and wellbeing credits?	The construction process will be expected to create employment and supply opportunities to local businesses. The workspace and new shop frontage will help strengthen the high street offer, drawing residents down from the high street and providing employment opportunities.	London Plan Policy E11 Skills and opportunities for all Workplace environment - BREEAM health and wellbeing credits.	Unemployment generally leads to poverty, illness anda reduction in personal and social esteem. Employment can aid recovery from physical and mental illnesses.  Creating healthier workplaces can reduce ill health and employee sickness absence.
Access to local food shops	Does the proposal provide opportunities for local food shops?  Does the proposal avoid an over-concentration or clustering of hot food takeaways in the local area?	The Proposed Development does not include any hot food takeaways.	London Plan Policies SD6 and SD7 London Plan Policy E9 Retail, markets and hot food takeaways	A proliferation of hot food takeaways and other outlets selling fast food can harm the vitality and viability of local centres and undermine attempts to promote the consumption of healthy food, particularly in areas close to schools.

Twickenham Riverside August 2021 11

#### **Health Impact Assessment**

#### Twickenham Riverside

#### Public realm

Does the design of the public realm maximise opportunities for social interaction and connect the proposal with neighbouring communities?

Does the proposal allow people with mobility problems or a disability toaccess buildings and places?

The Proposed Development will maintain the public realm in the centre of the Site, including the provision of opportunities for communal activity at lower levels, including places to eat, exercise, shop and meet will increase community interaction, opportunities for physical activity and reduce isolation often experienced especially by older and disabled people. CCTV coverage will be provided for public amenity spaces and connections to councilrun CCTV system to enhance safety. Additionally, street frontages will be animated, further stimulating interest, passive surveillance, safety and convenience for all users, and the design principles embedded within the Proposed Development will deliver improvements to the appearance and orientation of public realm, reinforcing the sense of identity in the Site.

London Plan Policy D5 Inclusive design

London Plan Policy D8 Public realm

Shaping Neighbourhoods. Accessible London: Achieving and Inclusive Environment SPG (Oct 2014)

Housing SPG Standard 10 on active frontages

The public realm has an important role to play in promoting walking and cycling, activity and social interaction. It also affects people's sense of place, security and belonging. It is a key component of a lifetime neighbourhood.

Shelter, landscaping, street lighting and seating can make spaces attractive and inviting.

Implementing inclusive design principles effectively creates an accessible environment, in particular for disabled and older people.
