---

Dear Transport Infrastructure Planning Unit,

I am concerned about the proposed changes to the Meldreth Road level crossing in Shepreth.

I have travelled this route twice a day for twenty years and have never seen any problems at this crossing or any near misses

Its currently a short wait unless 2 trains are coming.

From what I understand the proposed new barrier will be down for much longer.

I would expect this will mean people accelerating to get through before it comes down which will be less safe.

Drivers will be frustrated at a longer wait as they are already with the new crossing at Shepreth station which is a frustratingly long wait since it was changed.

I would expect the proposed changes to be much worse for the local residents too.

The potential downsides of the proposed change outweigh the perceived up sides in my opinion and I would like to object to the crossing changing.

I hope the local concerns are heard and the crossing remains as it is.

Thank you.

Kind regards,

Mark Dodds
