1.0 Introduction

Background

- 1.1 Hub Transport Planning Ltd has been commissioned by the Trustees of WE Gale to provide transport advice for a proposed commercial development on land to the north of the A4130, Didcot.
- 1.2 At this stage, whilst the proposed development is not explicitly defined, it is expected to be a mix of B1, B2 and B8 and has therefore been assessed as such within this report; for the purpose of the site access capacity testing, it has been assumed that the proposed development will comprise c.17,000sqm GFA.
- 1.3 The site location is shown on **Figure 1.1**.

Structure of the Report

- 1.4 This report is a Transport Assessment Scoping Report (TASR) and the purpose of the report is to set out the intended geographical and technical scope for the TA that will accompany the planning application for the proposed development.
- 1.5 It is intended that this report will be submitted to Oxfordshire County Council (OCC) as Highway Authority for comment and agreement regarding the technical and geographical scope of the assessment.
- 1.6 Following this introduction, the report is set out as follows:
 - Chapter 2 – Background Information
 - Chapter 3 – Access Strategy
 - Chapter 4 – Trip Generation and Assignment
 - Chapter 5 – Traffic Impact and Analysis
 - Chapter 6 – Sustainable Travel

Limitations of the Report

- 1.7 This report has been undertaken at the request of the Trustees of WE Gale, thus should not be entrusted to any third party without written permission from Hub Transport Planning Ltd. However, should any information contained within this report be used by any unauthorised third party, it is done so entirely at their own risk and shall not be the responsibility of Hub Transport Planning Ltd.
- 1.8 This report has been compiled using data from a number of external sources (such as TRICS and public transport information); these sources are considered to be trustworthy and therefore the data provided is considered to be accurate and relevant at the time of preparing this report.

2.0 Background Information

Site Location and Highway Network

- 2.1 The site is located to the north of the A4130 and is bounded by Appleford Sidings to the north, Didcot Power Station to the west, open fields to the east, and the A4310 to the south.
- 2.2 The A4130 runs along the entire southern frontage of the site, forming roundabout junctions with Collett (to the east) and Hawksworth (to the south); further south it connects to Milton Road, the B4493 and (further west) to the A34, thus providing local connections to Didcot as well as strategic connections to Oxford and Newbury.
- 2.3 In the vicinity of the site, the A4130 is subject to a 50mph speed limit.
- 2.4 We have previously considered access to this site in November 2017; at this time, observations of the highway network suggested that the A4130/B4493 corridor experienced congestion during peak periods.
- 2.5 At present, due to the Covid-19 pandemic, a further site visit cannot be undertaken, as any observations of the highway network would be irrelevant due to the traffic conditions being abnormal.
- 2.6 However, the traffic flows obtained in early November 2017 are less than three years old and are thus considered to be representative for the purpose of the assessment work undertaken for this report. It is not clear what the medium or longer-term impacts of the Covid-19 pandemic will be, in respect of traffic flows across the UK; however, current indications are that people are likely to be travelling less and there is expected to be a shift towards more sustainable modes of travel (such as walking and cycling). As such, it is considered that the November 2017 traffic count data, with growth applied to a suitable design year, provides a robust assessment of the site access proposals considered in this report.

Traffic Data Collection

- 2.7 As indicated previously in this report, ATC speed surveys were undertaken on the A4130 between Friday 3rd and Thursday 9th November 2017; the data is included as **Appendix A** to this report.
- 2.8 The highway network peak hour flows are shown on **Figures 2.1 to 2.4** and indicated two-way traffic flows along the A4130 of c.1,200 vehicles during both the morning and evening peak hours.
- 2.9 The speed data indicates that passing 85th percentile traffic speeds adjacent to the existing site access are slightly below the prevailing 50mph speed limit.
- 2.10 The observed morning and evening highway network peak hours are 08:00-09:00 and 17:00-18:00 respectively.

Oxfordshire County Council (OCC) Highway Infrastructure Proposals

- 2.11 There are significant improvements proposed for the highway network adjacent to the development site, which are associated with the OCC 2031 Local Plan.
- 2.12 In the vicinity of the site these include:
 - Scheme B: Science Bridge

- This will create a new road link between the A4130 to the west and to the Purchas Road/A4130/Hawksworth Road roundabout.
 - Improved pedestrian and cycle infrastructure will also be provided along the length of the Science Bridge.
 - This will improve access to the propose development for employees travelling to/from the west.
 - Scheme C: Culham to Didcot River Crossing
 - This will create a new road crossing over the River Thames between Culham and Didcot, providing direct access to the A4130 from areas to the north of Didcot such as Oxford.
 - This will provide a more efficient route for those travelling to/from the north via the A34.
- 2.13 Both of these schemes have a direct impact on the access strategy for the proposed development site and therefore have been taken into account in respect of the proposed site access design detailed in Section 3.0.
- 2.14 The two schemes are provided as **Appendix B** to this report.

3.0 Access Strategy

Proposed Access

- 3.1 The proposed site access junction is shown on **Drawing T20538.001** and takes the form of a ghost island priority junction with right-turn lane.
- 3.2 The visibility splays to/from the site access are based on DMRB design standards for the prevailing speed limit of 50mph; therefore, splays of 2.4 x 160m are shown in both directions. To the northeast, the splay crosses the lanes of the A4130 (due the access being on the outside of the bend) and thus a further splay to the tangent point is also provided.
- 3.3 As shown on **Drawing T20538.001**, the access junction proposed is mindful of the OCC highway infrastructure schemes both to the southwest and northeast of the site, plus the proposed pedestrian and cycle route along the southern frontage of the development site (just inside the site itself).
- 3.4 A raised pedestrian and cycle crossing of the site access road is proposed which accords with the adjacent OCC scheme; within the site, the 5.0m wide shared route would narrow to 2.0m, with cyclists entering/leaving the carriageway at this location.
- 3.5 The OCC scheme is shown in light blue and the proposed site access junction ties into this at both ends; in respect of the pedestrian and cycle route, this has been diverted slightly around two areas of earth banking within the site, which facilitates a large articulated HGV being able to enter the site without affecting through-traffic and to leave the site without affecting pedestrian/cycle traffic along the new route.
- 3.6 Swept path analysis for the site access junction is provided on **Drawings T20538.002** and **003** and demonstrates that an FTA articulated design vehicle can enter and leave the site comfortably in all directions; these drawings also demonstrate that the design vehicle can store between the A4130 and the pedestrian/cycle crossing, without impacting on the former (in terms of affecting through-traffic).

Proposed Parking Provision

- 3.7 The Vale of White Horse District Council (VWHDC) Parking Standards, included under Local Plan Policy DC5 SPD (2006), provides maximum parking standards based on the land use classification. The following standards, applicable to the proposed development, are listed below:
 - For B1 sites, 1 space is required per 30sqm
 - For B2 sites, 1 space is required per 50sqm
 - For B8 sites, 1 space is required per 200sqm
- 3.8 The precise level of parking provision on site will be agreed with the Local Planning Authority at the planning application stage and will be set out within the TA.

Relevant Transport Policy

- 3.9 The Transport Assessment will include a summary of transport policy, at a local, regional and national level, relevant to the development proposal.

4.0 Trip Generation and Assignment

Proposed Development

4.1 As indicated in Section 1.0, the proposed development is expected to be a commercial B1, B2 and B8 employment site, which we have assumed based on the site area, will comprise c.17,000sqm GFA.

Trip Rates

4.2 The TRICS (7.7.2) database has been consulted to inform the potential traffic generation of the site. It should be noted that the database incorporates B1, B2 and B8 uses within its Industrial Estate classification.

4.3 The following parameters have been used for the assessment of industrial estate traffic generation:

- Land Use – Employment, Industrial Estate;
- Regions – United Kingdom (excluding Greater London and Northern Ireland);
- Selected Locations – Suburban, Edge of Town and Edge of Town Centre;
- Units – 552 to 24980sqm
- Date Range – 01/01/12 to 10/10/19
- Selected Days – Weekdays

4.4 The trip rates are presented in **Table 1** and the TRICS output is provided in **Appendix C**.

Table 1 – Trip Rates – Industrial Estate

Peak Period	Trip Rate (per 100 sqm)		Trips (17,000sqm)		Total
	In	Out	In	Out	
AM	0.465	0.242	79	41	120
PM	0.265	0.439	45	75	120

NB: AM peak is 08:00-09:00, PM peak is 16:00-17:00; trips have been rounded

4.5 The forecast traffic generation detailed in **Table 1** above indicates that the proposed development would result in 120 two-way trips in any peak period. This would result in two additional vehicle movements every minute during each peak period and just over one vehicle per minute in any single direction.

4.6 It should be noted that based on the TRICS analysis, the resultant peak hours based on an industrial estate land use are 08:00-09:00 for the morning peak and 16:00-17:00 for the evening peak.

Traffic Distribution and Assignment

4.7 In order to distribute traffic to and from the site, 2011 Census Travel to Work Origin Destination data has been used. The MSOA South Oxfordshire 009 and Vale of White Horse 010 areas have been used as the place of work. These areas cover the area in which the site sits as well as surrounding existing industrial estates and are considered as appropriate areas for the distribution and assignment exercise for traffic to the proposal site. The analysis of this data is included in **Appendix D**.

4.8 Traffic has been assigned to the network using an appropriate online route mapping tool and knowledge of the existing area. Consideration has also been given to the fact that some routes may change once the proposed highway infrastructure improvement plans by OCC are in place.

Existing Highway Network

4.9 On the basis of the current highway network layout, the analysis indicates that approximately 72% of traffic will assign to/from the west and the remaining 28% to/from the east.

4.10 Of the 72% of traffic that is expected to head to/from the west:

- 53% of traffic will assign via the A4130 (western arm of the A4130/B4493/Mendip Heights roundabout).
- 12% will assign via B4493 (eastern arm of the A4130/B4493/Mendip Heights roundabout).
- 7% will assign via Milton Road.

4.11 Of the 28% of traffic that is expected to head to/from the east:

- 16% of traffic will assign via Abingdon Road.
- 6% of traffic will assign via Lady Grove.
- 3% of traffic will assign via Avon Way.
- 3% of traffic will assign via Mersey Way.

4.12 The expected development traffic assignment is shown in **Appendix E**.

Proposed Highway Network

4.13 When the proposed transport improvement schemes in the vicinity of the site are finalised, the analysis indicates the same split of 72% west and 28% east.

4.14 Of the 72% of traffic that is expected to assign to/from the west:

- 60% of traffic will assign via the proposed 'Science Bridge' which provides a connection between the Purchas Road/A4130/Hawksworth Roundabout and the A4130 as well as potentially to the B4493/Harwell Link Road roundabout.
- 12% will assign via the B4493 (eastern arm of the A4130/B4493/Mendip Heights roundabout) and then continue north on the A4130 to access the site.

4.15 Of the 28% of traffic that is expected to head to/from the east:

- 16% of traffic will assign via Abingdon Road.
- 6% of traffic will assign via the 'Culham to Didcot River Crossing'.
- 3% of traffic will assign via Avon Way.
- 3% of traffic will assign via Mersey Way.

T20538
Land North of A4130, Didcot

Committed Development Traffic

- 4.16 During the pre-application process we will liaise with Oxfordshire County Council and the Vale of White Horse District Council as the Local Planning Authority, to agree all committed developments within the vicinity of the site that need to be taken into account as part of the cumulative impact assessment.

5.0 Traffic Impact and Analysis

Development Traffic Impact

- 5.1 The geographic scope of the assessment will focus on the junctions that provide immediate access to the site. Taking into consideration the size and location of the development, capacity assessments will be provided at the following junctions:
- The new A4103 priority junction (adjacent to the site access junction).
 - A4130/Collett Roundabout.
 - A4130/Purchas Road/Hawksworth Roundabout.
- 5.2 Should the proposed transport improvement schemes be updated such that they impact on the layout of any of the above junctions, the amended junction layouts will be modelled accordingly within the TA.
- 5.3 Traffic flow diagrams will be provided to indicate potential changes in traffic flow as a result of the proposed transport improvement schemes; this will be discussed and agreed with OCC in due course.

Traffic Analysis Methodology

- 5.4 The highway network in the vicinity of the site will be assessed during AM and PM peak periods for the following proposed scenarios:
- 2031 Base
 - 2031 Base + Committed
 - 2031 Base + Committed + Development
- 5.5 The traffic growth factors used to forecast future year (2031, end of local transport plan period) base traffic have been taken from local TEMPRO growth factors (adjusted by NTM), using Vale of White Horse 010 and South Oxfordshire 009 geographical areas. The resulting factors are as follows:
- Vale of White Horse 010*
- 2017 to 2031 Weekday AM: 1.1711
 - 2017 to 2031 Weekday PM: 1.1775
- South Oxfordshire 009*
- 2017 to 2031 Weekday AM: 1.1368
 - 2017 to 2031 Weekday PM: 1.1314
- 5.6 The geographical areas used for the TEMPro factors align with those used for the workplace location in the Origin/Destination data. As the TEMPro growth factors are higher for the Vale of White Horse location, these will be used in the subsequent TA to represent a worst-case scenario.
- 5.7 The resultant traffic flows at the aforementioned junctions and the site access, will be modelled using appropriate software to assess the capacity of the junction in the base and 'with development' scenarios.

Highway Safety

- 5.8 In order to establish road safety conditions on the highway network in the vicinity of the site, Personal Injury Accident (PIA) data will be obtained from OCC. The area to be considered in the TA will include the following junctions and their links:
- A4130/Collett Roundabout
 - Purchas Road/A4130/Hawksworth Roundabout
- 5.9 In order to provide an indication of existing accidents in the area, the Crashmap website has been used and an extract is included in **Appendix F**.
- 5.10 Over the latest five-year period available (2015-2019), three PIAs have been recorded in the search area, all classed a slight.
- 5.11 None of the aforementioned PIAs involved a pedestrian casualty and one involved a cyclist casualty.
- 5.12 It should however be noted that the infrastructure improvements proposed in the vicinity of the site are likely to result in a safer highway network for all users, including pedestrians and cyclists.
- 5.13 Overall, the volume and pattern of accidents in the search area does not give any undue cause for concern. Nevertheless, the TA that will be prepared to support any subsequent planning application will consider the PIAs across the network in further detail including causation factors (where such information is available).

Proposed Mitigation

- 5.14 Any necessary mitigation, as a result of traffic impact, will be considered within the TA, including any further mitigation required in addition to the infrastructure schemes proposed by OCC.

6.0 Sustainable Travel

- 6.1 The proposed development site is located in close proximity to a number of services that employees may wish to use during break periods, including a number of catering facilities and a gym located within Southmead Industrial Park to the south of the site.
- 6.2 Consideration will be given to bus services being re-routed to serve the development site, which alongside the proposed improvements to pedestrian and cycle networks on the A4130 adjacent to the proposed development, will provide employees with a choice of sustainable travel modes to travel to/from the site.
- 6.3 A full sustainability appraisal will be included as part of the TA. This will include a review of local facilities in the vicinity of the site suitable for employees to use during break periods or on their way to/from work. The TA will also consider access to the site via sustainable travel modes such as walking and cycling routes and bus and rail services.
- 6.4 The sustainability appraisal will take into consideration both existing facilities and services in the vicinity of the site and proposed improvements, such as those to be provided as part of OCC transport infrastructure proposals.

Filtering Summary

Land Use	02/D	EMPLOYMENT/INDUSTRIAL ESTATE
Selected Trip Rate Calculation Parameter Range	552-25000 sqm GFA	
Actual Trip Rate Calculation Parameter Range	1138-24980 sqm GFA	
Date Range	Minimum: 01/01/12	Maximum: 10/10/19
Parking Spaces Range	All Surveys Included	
Days of the week selected	Monday	7
	Tuesday	9
	Wednesday	4
	Thursday	8
	Friday	9
Main Location Types selected	Suburban Area (PPS6 Out of Centre)	13
	Edge of Town	24
Population <1 Mile ranges selected	1,000 or Less	1
	1,001 to 5,000	1
	5,001 to 10,000	4
	10,001 to 15,000	7
	15,001 to 20,000	6
	20,001 to 25,000	6
	25,001 to 50,000	11
	50,001 to 100,000	1
Population <5 Mile ranges selected	25,001 to 50,000	2
	50,001 to 75,000	1
	75,001 to 100,000	2
	100,001 to 125,000	3
	125,001 to 250,000	20
	250,001 to 500,000	7
	500,001 or More	2
Car Ownership <5 Mile ranges selected	0.6 to 1.0	17
	1.1 to 1.5	17
	1.6 to 2.0	3
PTAL Rating	No PTAL Present	37

Calculation Reference: AUDIT-141301-200825-0812

TRIP RATE CALCULATION SELECTION PARAMETERS:

Land Use : 02 - EMPLOYMENT
 Category : D - INDUSTRIAL ESTATE
 VEHICLES

Selected regions and areas:

02	SOUTH EAST	
	ES EAST SUSSEX	2 days

	FI FIFE	1 days

This section displays the number of survey days per TRICS® sub-region in the selected set

Primary Filtering selection:

This data displays the chosen trip rate parameter and its selected range. Only sites that fall within the parameter range are included in the trip rate calculation.

Parameter: Gross floor area
 Actual Range: 1138 to 24980 (units: sqm)
 Range Selected by User: 552 to 25000 (units: sqm)

Parking Spaces Range: All Surveys Included

Public Transport Provision:

Selection by: Include all surveys

Date Range: 01/01/12 to 10/10/19

This data displays the range of survey dates selected. Only surveys that were conducted within this date range are included in the trip rate calculation.

Selected survey days:

Monday	7 days
Tuesday	9 days
Wednesday	4 days
Thursday	8 days
Friday	9 days

This data displays the number of selected surveys by day of the week.

Selected survey types:

Manual count	37 days
Directional ATC Count	0 days

This data displays the number of manual classified surveys and the number of unclassified ATC surveys, the total adding up to the overall number of surveys in the selected set. Manual surveys are undertaken using staff, whilst ATC surveys are undertaken using machines.

Selected Locations:

Suburban Area (PPS6 Out of Centre)	13
------------------------------------	----

This data displays the number of surveys per main location category within the selected set. The main location categories consist of Free Standing, Edge of Town, Suburban Area, Neighbourhood Centre, Edge of Town Centre, Town Centre and Not Known.

Selected Location Sub Categories:

Industrial Zone	19
Commercial Zone	1
Development Zone	2
Residential Zone	11
No Sub Category	4

This data displays the number of surveys per location sub-category within the selected set. The location sub-categories consist of Commercial Zone, Industrial Zone, Development Zone, Residential Zone, Retail Zone, Built-Up Zone, Village, Out of Town, High Street and No Sub Category.

Secondary Filtering selection:

Use Class:

n/a	1 days
Not Known	2 days
B1	11 days
B2	17 days
B8	4 days

This data displays the number of surveys per Use Class classification within the selected set. The Use Classes Order 2005 has been used for this purpose, which can be found within the Library module of TRICS®.

Population within 1 mile:

1,000 or Less	1 days
1,001 to 5,000	1 days
5,001 to 10,000	4 days
10,001 to 15,000	7 days
15,001 to 20,000	6 days
20,001 to 25,000	6 days
25,001 to 50,000	11 days
50,001 to 100,000	1 days

This data displays the number of selected surveys within stated 1-mile radii of population.

Population within 5 miles:

25,001 to 50,000	2 days
50,001 to 75,000	1 days
75,001 to 100,000	2 days
100,001 to 125,000	3 days
125,001 to 250,000	20 days
250,001 to 500,000	7 days
500,001 or More	2 days

This data displays the number of selected surveys within stated 5-mile radii of population.

Car ownership within 5 miles:

0.6 to 1.0	17 days
1.1 to 1.5	17 days
1.6 to 2.0	3 days

This data displays the number of selected surveys within stated ranges of average cars owned per residential dwelling, within a radius of 5-miles of selected survey sites.

Travel Plan:

No	37 days
----	---------

This data displays the number of surveys within the selected set that were undertaken at sites with Travel Plans in place, and the number of surveys that were undertaken at sites without Travel Plans.

PTAL Rating:

No PTAL Present	37 days
-----------------	---------

This data displays the number of selected surveys with PTAL Ratings.

Total Rates:			3.850			3.884			7.734

This section displays the trip rate results based on the selected set of surveys and the selected count type (shown just above the table). It is split by three main columns, representing arrivals trips, departures trips, and total trips (arrivals plus departures). Within each of these main columns are three sub-columns. These display the number of survey days where count data is included (per time period), the average value of the selected trip rate calculation parameter (per time period), and the trip rate result (per time period). Total trip rates (the sum of the column) are also displayed at the foot of the table.

*To obtain a trip rate, the average (mean) trip rate parameter value (TRP) is first calculated for all selected survey days that have count data available for the stated time period. The average (mean) number of arrivals, departures or totals (whichever applies) is also calculated (COUNT) for all selected survey days that have count data available for the stated time period. Then, the average count is divided by the average trip rate parameter value, and multiplied by the stated calculation factor (shown just above the table and abbreviated here as FACT). So, the method is: COUNT/TRP*FACT. Trip rates are then rounded to 3 decimal places.*

The survey data, graphs and all associated supporting information, contained within the TRICS Database are published by TRICS Consortium Limited ("the Company") and the Company claims copyright and database rights in this published work. Parameter summary

Trip rate parameter range selected:	1138 - 24980 (units: sqm)
Survey date date range:	01/01/12 - 10/10/19
Number of weekdays (Monday-Friday):	37
Number of Saturdays:	0
Number of Sundays:	0
Surveys automatically removed from selection:	0
Surveys manually removed from selection:	7

This section displays a quick summary of some of the data filtering selections made by the TRICS® user. The trip rate calculation parameter range of all selected surveys is displayed first, followed by the range of minimum and maximum survey dates selected by the user. Then, the total number of selected weekdays and weekend days in the selected set of surveys are show. Finally, the number of survey days that have been manually removed from the selected set outside of the standard filtering procedure are displayed.
